

**Maules Creek Coal Mine**
**EPBC 2010/5566 (approved 11<sup>th</sup> February 2013) Compliance Report March 2022**

Condition Number	Condition	Compliance	Evidence
<b>Disturbance Areas</b>			
1.	The person taking the action must not clear more than 544 hectares (ha) of the EPBC listed White Box—Yellow Box—Blakely's Red Gum Grassy Woodland and Derived Native Grassland critically endangered ecological community within the Maules Creek project area, as identified in Attachment A of these conditions.	Yes	Less than 544 ha of White Box—Yellow Box—Blakely's Red Gum Grassy Woodland and Derived Native Grassland has been cleared up until 22 December 2021.
2.	The person taking the action must not clear more than 1665 ha of habitat for the Regent Honeyeater ( <i>Anthochaera phrygia</i> : formerly <i>Xanthomyza phrygia</i> ), Swift Parrot ( <i>Lathamus discolor</i> ) or Greater Long-eared bat ( <i>Nyctophilus corbeni</i> ), within the Maules Creek project area. The 1665 ha of habitat specified includes the 544 ha of the critically endangered ecological community at condition 1.	Yes	Less than 1,655 ha of habitat for these three species (i.e. forest and woodland) has been cleared up until 22 December 2021.
3.	<p>The person taking the action must submit a Biodiversity Corridor plan for the approval of the <b>Minister</b> within three months of the date of this approval. The plan must address the following matters:</p> <ul style="list-style-type: none"> <li>a) protection of native vegetation of a total width of 500 metres (m) where the Maules Creek coal lease boundary is adjacent to the Boggabri coal mine lease boundary;</li> <li>b) maintenance in perpetuity of this area as a <b>biodiversity corridor</b>, and</li> <li>c) evidence that the <b>biodiversity corridor</b> will be protected in perpetuity through a legal mechanism that would provide the equivalent protection of a conservation covenant.</li> </ul> <p>The approved <b>Biodiversity Corridor</b> must be implemented.</p>	Yes	<p>The Biodiversity Corridor Plan (BCP) was submitted to the Department of the Environment (DotE) in May 2013. The latest version of the BCP was submitted to DAWE in January 2021 and was approved by DAWE on 23 December 2021.</p> <p>Whitehaven Coal (on behalf of Maules Creek Coal Mine) has commenced consultation with relevant stakeholders (NSW Forestry Corporation and Idemitsu Boggabri Coal) to establish a legal mechanism to protect the biodiversity corridor in perpetuity by 2053.</p>
4.	The person taking the action is required to submit a Conservation and Biodiversity Bond under condition 55 of the NSW state government project approval dated 23 October 2012 (Application 10_0138). It is noted that this bond may be combined with the rehabilitation security deposit as required under the NSW <i>Mining Act 1992</i> . The person taking the action must submit details of this bond and the rehabilitation security deposit, to the <b>Minister</b> . If the <b>Minister</b> is not satisfied that the bond and the rehabilitation security deposit lodged by the person taking the action is adequate to provide for the implementation of the requirements referred to under	Yes	The revised Maules Creek Coal Biodiversity Offset Conservation Bond calculation was submitted to NSW DPIE on 11 May 2021. The NSW DPIE approved the revised Maules Creek Coal Biodiversity Offset Conservation Bond calculation on 24 June 2021. Whitehaven Coal received confirmation from NSW DPIE on 7 December 2021 that the Revised Conservation had been

**Maules Creek Coal Mine**
**EPBC 2010/5566 (approved 11<sup>th</sup> February 2013) Compliance Report March 2022**

Condition Number	Condition	Compliance	Evidence
	conditions 3, 12A, 12B, 25-28 the <b>Minister</b> may require the person taking the action establish an additional bond or equivalent financial instrument in trust, under conditions approved in writing by the <b>Minister</b> .		successfully lodged and email notification to DAWE occurred on 9 December 2021. A revised Rehabilitation Cost Estimate calculation for Maules Creek Coal was submitted to NSW Resource Regulator in 5 July 2021. The Resource Regulator approved the revised Rehabilitation Cost Estimate on 11 November 2021 with the Rehabilitation Cost Estimate email notification to DAWE occurred on 9 December 2021.
5.	The person taking the action must provide a map to the Minister showing the area of the biodiversity corridor within the Maules Creek coal mine lease boundary within one month of this approval decision and detail the amount (in hectares) of White Box—Yellow Box— Blakely's Red Gum Grassy Woodland and Derived Native Grassland critically endangered ecological community and habitat or potential habitat for the regent honeyeater, swift parrot and greater long-eared bat within this area.	Yes	Submitted to DotE in March 2013.
6.	The person taking the action must submit to the Minister for approval, within three months of the commencement of the action, an approach that: <ul style="list-style-type: none"> <li>a. limits the maximum disturbance (in hectares) specified for each of the years 5, 10, 15 and 21 from the date of this approval of the White Box—Yellow Box—Blakely's Red Gum Grassy Woodland and Derived Native Grassland ecological community and the habitat or potential habitat for the regent honeyeater, swift parrot and greater long- eared bat;</li> <li>b. incorporates an analysis, undertaken by independent ecological experts approved by the Department, that demonstrates the maximum disturbance limits which will minimise any impacts on relevant matters of national environmental significance;</li> <li>c. demonstrates collaboration with the person taking the action to develop and operate the Boggabri Coal Project (EPBC 2009/5256), in order to</li> </ul>	Yes	Approval of suitably qualified independent ecological experts to undertake the revised Disturbance Limit Approach was received from DAWE on 19 July 2021. The revised Disturbance Limit Approach was submitted 10 September 2021 and approved by DAWE on 17 December 2021.

**Maules Creek Coal Mine**
**EPBC 2010/5566 (approved 11<sup>th</sup> February 2013) Compliance Report March 2022**

Condition Number	Condition	Compliance	Evidence
	minimise progressive project area disturbance limits across both sites. The progressive disturbance limits are to be reflected in the development of the Leard Forest Mining Precinct Biodiversity Strategy.		
7.	The person taking the action must not clear more than the maximum project area disturbance limits specified for each of the years 5, 10, 15 and 21 as described in condition 6, unless otherwise approved by the Minister.	Yes	Less than the Year 10 disturbance limit approach boundary has been developed up until 22 December 2021.
8.	The person taking the action must publish the analysis required under condition 6.b) on their website	Yes	Please refer to the analysis on the Whitehaven Coal website.
<b>Direct Offsets</b>			
9.	<p>The person taking the action must register legally binding conservation covenants over offset areas containing, to the satisfaction of the <b>Minister</b>, no less than:</p> <ul style="list-style-type: none"> <li>a. 9,334 ha of an equivalent or better quality of habitat for the regent honeyeater, swift parrot and greater long-eared bat; and</li> <li>b. 5,532 ha of an equivalent or better quality of the White Box—Yellow Box—Blakely's Red Gum Grassy Woodland and Derived Native Grassland ecological community.</li> </ul> <p>Note: the 5,532 ha of White Box-Yellow Box-Blakely's Red Gum Grassy Woodland and Derived Native Grassland ecological community may be included within the 9,334 ha of offset area for the threatened species if it meets the listing criteria for the EPBC-listed critically endangered ecological community as defined in the EPBC listing advice for that community and the requirements of condition 9.</p>	Not Yet Triggered	The combined (existing and additional) offset areas subject to EPBC Approval 2010/5566 are required to be protected by a legally binding covenant in perpetuity by 31 March 2024.
9A.	<p>The offset areas must be of an overall equivalent or better quality than the areas being cleared. This means:</p> <ul style="list-style-type: none"> <li>a. for White Box—Yellow Box—Blakely's Red Gum Grassy Woodland and Derived Native Grassland ecological community, offset areas must meet the definition of the ecological community described in the listing advice, and must be of an overall equivalent or better <b>condition class</b> than the areas being cleared, based on the proportion of each <b>condition class</b> represented and other relevant ecological attributes;</li> </ul>	Not Yet Triggered	The combined (existing and additional) offset areas subject to EPBC Approval 2010/5566 are required to be protected by a legally binding covenant in perpetuity by 31 March 2024 and are currently subject to an additional independent review when the quantum of biodiversity values will be finalised by 30 June 2022.

**Maules Creek Coal Mine**
**EPBC 2010/5566 (approved 11<sup>th</sup> February 2013) Compliance Report March 2022**

Condition Number	Condition	Compliance	Evidence
	b. for the threatened species, the quality of the habitat for the species, taking account of its ecological requirements, must be equivalent to or better than the areas being cleared.		
10.	The person taking the action must verify through <b>independent review</b> the quantity and <b>condition class</b> of White Box—Yellow Box—Blakely's Red Gum Grassy Woodland and Derived Native Grassland ecological community and the quantity and quality of habitat for the regent honeyeater, swift parrot and greater long-eared bat within all offset areas proposed in the <b>Environmental Assessment</b> , as specified at Attachment B of these conditions, and any additional offsets as required under condition 11. Details of all independently verified offset areas proposed in the <b>Environmental Assessment</b> must be submitted to the <b>Minister</b> for approval by 30 December 2013. The findings of the <b>independent review</b> must be published on the website of the person taking the action and remain published until the expiry of this approval.	Yes	Submitted to DotE in December 2013. The findings of the independent review are published on the website.
11.	If the <b>independent review</b> finds that the offset areas proposed in the <b>Environmental Assessment</b> do not meet the requirements of conditions 9 and 9A, then additional areas must be included in the offset areas until the <b>independent review</b> finds that the relevant criteria under these conditions are met.	Yes	Submitted to DotE in December 2013 and April 2014.
11A.	For the purpose of condition 9, the offset areas may include additional offset areas to the offset areas which were the subject of <b>independent review</b> under conditions 10 and 11 if: <ul style="list-style-type: none"> <li>a) the person taking the action submits a report to the <b>Minister</b> for approval, which has been subject to <b>additional independent review</b>, that identifies and verifies the quantity and <b>condition classes</b> of White Box—Yellow Box—Blakely's Red Gum Grassy Woodland and Derived Native Grassland ecological community and the quantity and quality of <b>habitat</b> for the regent honeyeater, swift parrot and greater long-eared bat within the additional offset areas;</li> </ul>	Not Yet Triggered	The additional offset areas subject to EPBC Approval 2010/5566 are currently subject to an additional independent review which will verify the condition classes and quality by 30 June 2022.

**Maules Creek Coal Mine**
**EPBC 2010/5566 (approved 11<sup>th</sup> February 2013) Compliance Report March 2022**

Condition Number	Condition	Compliance	Evidence
	b) that report is submitted to the <b>Minister</b> for approval by 30 June 2022, unless otherwise agreed by the Minister in writing; and c) the <b>Minister</b> has approved that report. The person taking the action must publish the report on its website within 30 days of the <b>Minister's</b> approval, unless otherwise agreed by the <b>Minister</b> in writing.		
12.	REVOKED		
12A.	The person taking the action must submit to the <b>Minister</b> for approval an Offset management plan for all of the offset areas proposed in the <b>Environmental Assessment</b> , specified in Attachment B, within 12 months of this approval. The approved Offset management plan must be implemented for all of the offset areas proposed in the <b>Environmental Assessment</b> , specified in Attachment B, and any offset areas agreed as a result of independent verification process as specified in conditions 10 and 11, unless the <b>Minister</b> agrees to the removal of any specific properties as an offset area under this approval. If, after 31 October 2021, the <b>Minister</b> informs the person taking the action that the submitted Offset management plan is not suitable for approval, the <b>Minister</b> may, after 30 December 2021, approve a version of the Offset management plan revised by the <b>Department</b> . Note: for consistency, the person taking the action may develop a Biodiversity Management plan that includes the requirements set for managing offsets and set out in these conditions, to align with the requirements of the NSW state government Project Approval dated 23 October 2012 (application number 10_0138) and this approval.	Yes	The Maules Creek Coal Mine Offset Management Plan was submitted to DAWE on 5 November 2021 and subsequently approved on 20 December 2021.
12B.	The person taking the action must submit to the <b>Minister</b> for approval an Additional Offset management plan for the additional offset areas within 6 months of their approval under condition 11A. The person taking the action must implement the approved Additional offset management plan. If, after a further 3 months, the <b>Minister</b> informs the person taking the action that the submitted Additional Offset management plan is not suitable for approval, the <b>Minister</b> may, after a further 3 months, approve a version of the Additional Offset management plan revised by the <b>Department</b> . Notes:	Not Yet Triggered	The additional offset management plan will be submitted by 30 December 2022.

**Maules Creek Coal Mine  
EPBC 2010/5566 (approved 11<sup>th</sup> February 2013) Compliance Report March 2022**

Condition Number	Condition	Compliance	Evidence
	<p>(1) for consistency, the person taking the action may develop a Biodiversity Management plan that includes the requirements set for managing offsets and set out in these conditions, to align with the requirements of the NSW state government Project Approval dated 23 October 2012 (application number 10_0138) and this approval.</p> <p>(2) with the agreement of the <b>Minister</b>, the person taking the action may combine the Offset management plan and the Additional Offset management plan.</p>		
12C.	<p>Each <i>offset management plan</i> must include, but not be limited to, the following:</p> <p>a) a text description and map which clearly defines the location and boundaries of the offset areas. This must be accompanied by the <b>offset attributes</b> and <b>shapefiles</b>;</p> <p>b) a description of the methodology and results of surveys measuring the baseline ecological conditions in the offset areas. This must be consistent with the <b>State and Transition Model</b> and include but not be limited to:</p> <ul style="list-style-type: none"> <li>i. the extent and condition of all vegetation communities, including a description of the structure, floristics and tree age class representation of each community;</li> <li>ii. the extent and <b>condition class</b> of all areas of the White Box—Yellow Box—Blakely's Red Gum Grassy Woodland and Derived Native Grassland ecological community;</li> <li>iii. surveys targeting the regent honeyeater, swift parrot and greater long-eared bat;</li> <li>iv. the extent and quality of all areas of habitat for the regent honeyeater, swift parrot and greater long-eared bat;</li> <li>v. the location of all survey sites (including co-ordinates);</li> <li>vi. photo reference points at survey sites.</li> </ul> <p>c) clearly defined ecological management objectives for the <b>offset areas</b>;</p> <p>d) detailed description of all ecological management activities proposed to be undertaken, including maps and/or diagrams showing areas to be managed and the timing of the proposed activities;</p> <p>e) details of ongoing ecological monitoring programs, performance criteria, targets and provisions for adaptive management, including but not limited to:</p>	Yes	The Maules Creek Coal Mine Offset Management Plan was submitted to DAWE on 5 November 2021 and subsequently approved on 20 December 2021.

**Maules Creek Coal Mine**

**EPBC 2010/5566 (approved 11<sup>th</sup> February 2013) Compliance Report March 2022**

Condition Number	Condition	Compliance	Evidence
	<ul style="list-style-type: none"> <li>i. a set of measurable ecological indicators for detecting changes to the White Box—Yellow Box—Blakely's Red Gum Grassy Woodland and Derived Native Grassland ecological community, including those that may be ascribed to ongoing water stress;</li> <li>ii. a monitoring plan to assess the success of the management activities measured against the baseline condition. The monitoring must be statistically robust and able to quantify change in the condition of the White Box—Yellow Box—Blakely's Red Gum Grassy Woodland and Derived Native Grassland ecological community and habitat for the regent honeyeater, swift parrot and greater long-eared bat. This should include the use of control sites and periodic ecological surveys to be undertaken by a qualified ecologist;</li> <li>iii. a list of performance criteria based on the ecological management objectives for the White Box—Yellow Box—Blakely's Red Gum Grassy Woodland and Derived Native Grassland ecological community and habitat for the regent honeyeater, swift parrot and greater long-eared bat;</li> <li>iv. measures to exclude weeds from all offset areas for the period covered by this approval;</li> <li>v. a description of the potential risks to successful management against the performance criteria, and a description of the contingency measures that would be implemented to mitigate against these risks;</li> <li>vi. a process by which to report to the department the progress of management activities undertaken in the offset areas and the outcome of those activities, including identifying any need for improved management and activities to undertake such improvement.</li> <li>f) details of all parties responsible for management, monitoring and implementing the management activities, including their position or status as a separate contractor;</li> <li>g) details of the funding requirements for the ongoing management activities, including an estimate of the costs of the activities and details of the parties responsible for funding the activities.</li> </ul>

**EPBC 2010/5566 (approved 11<sup>th</sup> February 2013) Compliance Report March 2022**

Condition Number	Condition	Compliance	Evidence
14.	<p><b>Mining activity affecting offsets areas</b></p> <p>If the person taking the action proposes to undertake any mining activity within or beneath areas secured in accordance with conditions 9, 13 and 13A, then approval to undertake that action must be obtained in writing from the <b>Minister</b> before undertaking any mining activity within or beneath such areas. In seeking the <b>Minister's</b> approval, the person undertaking the action must provide a detailed assessment of the area where the mining activity is proposed to take place and an assessment of all associated adverse impacts on <b>matters of national environmental significance</b>. If the <b>Minister</b> agrees to the action within the <b>offset areas</b>, the area identified for the action must be excised from the <b>offset area</b> and alternative offsets secured by the person taking the action at a ratio of at least 20:1 in relation to the impact on <b>matters of national environmental significance</b>.</p> <p>Notes:</p> <p>(1) For the avoidance of any doubt, condition 14 does not apply to an offset area proposed in the <b>Environmental Assessment</b>, as specified at Attachment B of these conditions, if the Minister has agreed in writing to the removal of the property as an offset area pursuant to condition 13 of this approval.</p> <p>(2) In accordance with the EPBC Act, if the proposed mining activity is not part of the approved action, the proposed mining activity cannot be approved as part of this EPBC Act approval.</p>	Not Yet Triggered	No offset areas proposed for any mining activity.
15.	<p>To compensate for the loss of the White Box-Yellow Box-Blakely's Red Gum Grassy Woodland and Derived Native Grassland ecological community and habitat for the regent honeyeater, swift parrot and greater long-eared bat the person taking the action must submit to the Minister for approval, within 2 years of the date of this approval, a project plan to invest \$1 million for research that will identify effective methodologies for achieving rehabilitation and restoration of functioning White Box-Yellow Box-Blakely's Red Gum Grassy Woodland and Derived Native Grassland ecological community on mining sites. The research must be undertaken by a third party and be available to industry and governments generally. The approved project plan must be implemented.</p>	Yes	A Box-Gum Woodland Research Project Plan Version 2 (December 2016) was approved by DoEE on the 6 January 2017.

**Maules Creek Coal Mine**
**EPBC 2010/5566 (approved 11<sup>th</sup> February 2013) Compliance Report March 2022**

Condition Number	Condition	Compliance	Evidence
16.	To compensate for the loss of the habitat for the regent honeyeater, swift parrot and greater long-eared bat the person taking the action must provide \$1.5 million over the life of the approval (comprising \$500,000 for each of the regent honeyeater, swift parrot and greater long-eared bat), to deliver activities that implement priority recovery actions for the regent honeyeater, swift parrot and greater long-eared bat. A detailed project plan governing the timing of the \$1.5 million funding for the activities and outcomes must be developed. The project plan must be submitted to the Minister for approval by 30 April 2017, or otherwise agreed in writing by the Minister. The project plan should demonstrate consultation with relevant species experts and be consistent with approved National Recovery Plans where they are available, and as agreed with the relevant Recovery Planning Teams. The approved project plan must be implemented.	Yes	A Threatened Species Project Plan (Version 2.4 June 2020) was approved by DAWE on the 6 November 2020.
17.	REVOKED		
18.	REVOKED		
19.	REVOKED		
<b>Surface and groundwater management plans</b>			
20.	The person taking the action must provide to the Minister for approval, the surface and groundwater management plans as identified in condition 40 of the NSW state government Project Approval dated 23 October 2012 (application number 10_0138). The surface and groundwater management plans must be approved by the Minister prior to commencement of construction.	Yes	Submitted to DotE in 2013. A letter approving the Water Management Plan was received from the Minister in July 2013. The letter also states that Conditions 20, 21 and 22 have been met.
21.	The surface and groundwater management plans must be consistent with the National Water Quality Management Strategy.	Yes	Refer to Condition 20.
22.	The person taking the action must, prior to commencement of construction, in collaboration with the proponent to develop and operate the Boggabri Extension (EPBC 2009/5256) and any other approved mines within 20 kilometres (km) of the project area, provide written advice to the Minister demonstrating how the NSW government approved surface and groundwater management plans (condition 20), addresses the cumulative impact of groundwater drawdown as a result of mining	Yes	Refer to Condition 20.

**Maules Creek Coal Mine**
**EPBC 2010/5566 (approved 11<sup>th</sup> February 2013) Compliance Report March 2022**

Condition Number	Condition	Compliance	Evidence
	<p>and how this may impact on the consequent health of the remnant native vegetation in the Leard State Forest, the Leard State Conservation Area and surrounding areas. In particular the advice must address the following matters:</p> <ul style="list-style-type: none"> <li>a. maximum amount of allowable drawdown in the alluvial aquifer</li> <li>b. drawdown in hard rock</li> <li>c. trigger levels pertaining to drawdown in the alluvial aquifer when corrective actions will be required to be undertaken</li> <li>d. identify the depth of root zone of the native vegetation</li> <li>e. monitoring to assess the ongoing quality and quantity of both surface and groundwater to identify impacts on the native vegetation</li> </ul>		
23.	<p>The person taking the action must within 6 months of the date of this approval, or such other timeframe specified by the Minister, provide to the Minister a report on:</p> <ul style="list-style-type: none"> <li>a. any updated modelling of surface and groundwater impacts that has been undertaken in preparing the surface and groundwater management plans</li> <li>b. how the surface and groundwater management plans addressed groundwater and surface water impacts on matters of national environmental significance.</li> </ul>	Yes	Submitted to DotE in February 2014 in accordance with revised timeframe. Further a final Groundwater Modelling Report was submitted on the 13 <sup>th</sup> December 2021 to NSW DPE and DAWE was provided the report on 7th March 2022.
<b>Leard Forest Mining Precinct Regional Biodiversity Strategy</b>			
24.	<p>The person taking the action must implement the regional biodiversity strategy as required under condition 41 of the NSW state government project approval dated 23 October 2012 (application number 10_0138). The required scoping report for the development of the strategy must be submitted to the Minister for approval on or before 31 July 2013. The approved strategy must be implemented.</p>	Yes	DP&E finalised the Stage 1 report in July 2015. DP&E finalised the Stage 2 report on 1 September 2017.
<b>Mine site rehabilitation</b>			
25.	<p>To mitigate the impacts to the White Box-Yellow Box –Blakely's Red Gum Grassy Woodland and Derived Native Grassland and the habitat of the regent honeyeater, swift parrot and greater long-eared bat, the person taking the action must, within 12 months of the commencement of construction, submit to the Minister for approval</p>	Yes	The Mine Site Rehabilitation Plan was submitted to DotE in December 2014. Comments were received from DotE in July 2015. A revised Mine

	g. details of long-term management and protection of the mine site, including details of the commitment of funds to achieve this		
28.	The mine site rehabilitation plan must be subject to an independent review by a qualified ecologist prior to being submitted to the Minister for approval. The findings of the independent review must be published on the proponent's website.	Yes	The Mine Site Rehabilitation Plan (and independent review report) was approved by DoEE on 10 November 2016 and is on the Whitehaven Coal website.
<b>Final Landform</b>			
29.	<p><b>Final Landform</b> Note: for consistency, the person taking the action may develop a single <i>mine site rehabilitation plan</i> to align with the requirements, including timing of reporting, of the NSW State Government approval dated 23 October 2012 (Application 10_0138) and this approval. The Offset Management Plan and the Rehabilitation management Plan need to be aligned so as to achieve the biodiversity objectives of condition 29 for the rehabilitated mine-site.</p> <p>The person taking the action must undertake rehabilitation to ensure the final landform provides the optimum opportunity for the successful restoration of native forest and woodland including the critically endangered White Box—Yellow Box—Blakely's Red Gum Grassy Woodland and Derived Native Grassland ecological community.</p>	Yes	The Annual Review 2021 outlines that the rehabilitation as at 31 <sup>st</sup> December 2021 was in accordance with the Rehabilitation Strategy.
30.	<p>The person taking the action must undertake rehabilitation to ensure the final void and landform minimises the extent of any resulting pit lake, avoids salt scalding and ensures that drained waters do not adversely affect the downstream environment and avoids any impacts on matters of national environmental significance.</p> <p>Note: the State approval conditions for project 10_0138 require the preparation and implementation of an updated Final Void and Mine Closure Plan that considers interactions with the adjoining mines, including interaction between final voids, opportunities for integrated mine planning with adjoining mines to minimise environmental impacts, all reasonable and feasible landform options for the final void (including filling) and predicted hydrochemistry and hydrogeology (including long-term groundwater recovery and void groundwater quality).</p>	Not Yet Triggered	This condition was considered in developing the Draft Final Void and Mine Closure Plan that was submitted to the NSW Resources Regulator in December 2020. A final version of the Final Void and Mine Closure Plan will be prepared and submitted by end December 2026 as per the relevant State approval condition.

<b>Survey data</b>			
31.	All survey data collected for the project must be recorded so as to conform to data standards notified from time to time by the department. When requested by the department, the proponent must provide to the department all species and ecological survey data and related survey information from ecological surveys undertaken for matters of national environmental significance. This survey data must be provided within 30 business days of request, or in a timeframe agreed to by the department in writing. The department may use the survey data for other purposes.	Yes	Records are maintained.
32.	In the event that any additional matters of national environmental significance are recorded within the project area and a significant impact on the matter/s is likely, the department must be notified in writing within 14 days of the matter/s being recorded. In accordance with condition 37, the Minister may request that the person taking the action revise any relevant plans to ensure better protection of the relevant matter/s.	Yes	Notification of <i>Tylophora linearis</i> was provided in March 2014.
<b>Reporting and auditing</b>			
33.	Within 14 days after the commencement of construction, the person taking the action must advise the department in writing of the actual date of commencement of construction.	Yes	The DotE was advised in December 2013 that construction commenced on 23 December 2013.
34.	By the end of March of each year after the commencement of the action, the person taking the action must publish a report on their website addressing compliance with the conditions of this approval over the previous 12 months, including implementation of any approved management plans as specified in the conditions. Non-compliance with any of the conditions of this approval must be reported to the <b>department</b> at the same time as the compliance report is published.	Yes	Compliance reports have been annually published on the Whitehaven Coal website.
35.	Upon the direction of the Minister, the person taking the action must ensure that an independent audit of compliance with the conditions of approval is conducted and a report submitted to the Minister. The independent auditor must be approved by the Minister prior to the commencement of the audit. Audit criteria must be agreed to	Not Yet Triggered	No audit has been requested.

	by the Minister and the audit report must address the criteria to the satisfaction of the Minister.		
36.	If the person taking the action wishes to carry out any activity otherwise than in accordance with the approved plans, as specified in the conditions, the person taking the action must submit to the <b>department</b> for the <b>Minister's</b> written approval a revised version of that plan. The varied activity shall not commence until the <b>Minister</b> has approved the revised plan in writing. The <b>Minister</b> will not approve a revised plan, unless the revised plan would result in an equivalent or improved environmental outcome. If the <b>Minister</b> approves the revised plan that plan must be implemented in place of the plan originally approved.	Not Yet Triggered	Revised plans have not been required to be submitted to the Minister.
37.	If the <b>Minister</b> believes that it is necessary or convenient for the better protection of listed threatened species and communities or listed migratory species to do so, the <b>Minister</b> may request that the person taking the action make specified revisions to the approved management plan specified in the conditions and submit the revised plan for the <b>Minister's</b> written approval. The person taking the action must comply with any such request. The revised approved plan must be implemented. Unless the <b>Minister</b> has approved the revised plan then the person taking the action must continue to implement the originally approved plan, as specified in the conditions.	Yes	In May 2014, DotE requested a revised Offset Management Plan and Mine Rehabilitation Management Plan to address <i>Tylophora linearis</i> . A revised BMP was provided in March 2015. The BMP was further revised in 2017 and 2018 (due to Leard Forest Regional Biodiversity Strategy) and comments from DAWE were received 8 May 2020. The Maules Creek Coal Mine Offset Management Plan was submitted to DAWE on 5 November 2021 and subsequently approved on 20 December 2021.
38.	If, at any time after 5 years from the date of this approval, the person taking the action has not substantially commenced the action, then the person taking the action must not substantially commence the action without the written agreement of the Minister.	Yes	Extraction of coal for the purpose of commercial production commenced in August 2014.
<b>Publication of plans</b>			
39.	The person taking the action must maintain accurate records substantiating all activities and outcomes associated with or relevant to the above conditions of approval, including measures taken to implement the management plans required by this approval, and make them available upon request to the department. Such	Yes	Records are maintained of all activities in accordance with the approved management plans

	records may be subject to audit by the department or an independent auditor in accordance with section 458 of the Environment Protection and Biodiversity Conservation Act 1999, or used to verify compliance with the conditions of approval. Summaries of audits will be posted on the department's website. The results of audits may also be publicised through the general media.		but have not been requested by the Department and have not been subject to an audit.
40.	Unless otherwise agreed to in writing by the <b>Minister</b> , the person taking the action must publish all approved management plans referred to in these conditions of approval on their website. Each management plan must be published on the website within 1 month of being approved and remain published until the expiry of the approval.	Yes	Approved management plans will continue to be published on the Whitehaven Coal website.
