

## Maules Creek Site Monitoring

 <b>Air Quality (PM10)<sup>1</sup></b>	
Average reading for 24hr period 28 April 2025 00:00 to 29 April 2025 00:00	
TEOM 01  <b>5.00 (µg/m³)</b>	TEOM 03  <b>5.00 (µg/m³)</b>
Operational Response: Continue to monitor dust levels and implement operational changes if required, No action required – monitoring compliant and weather conditions favourable	

<sup>1</sup> PM10: particle matter 10 micron or less in size

 <b>Noise (LF)<sup>2</sup></b>		
Average reading for 24hr period 28 April 2025 to 29 April 2025		
Day: 7am-6pm  <b>25 dB(A)</b>	Evening 6pm-10pm  <b>28 dB(A)</b>	Nights 10pm-7am  <b>24 dB(A)</b>
Operational Response: Continue to monitor noise impacts and implement operational changes if required, No action required – monitoring compliant and weather conditions favourable		

<sup>2</sup> LF is estimated equivalent mining noise (LF = low frequency for band 20-630 HZ)

- The results are filtered to exclude the influence of excessive wind speed (> 3m/s) and rainfall,
- Monitoring results may include noise from other sources

 <b>Weather</b>
Weather Predictions for 29 April 2025
<b>North West Slopes Plains for Tuesday. Mostly sunny. Patchy fog on the slopes early this morning. Slight chance of a shower on the S plains in the late morning and afternoon. Light winds becoming SW 15 to 20 km/h in the early afternoon then becoming light in the evening.</b>
Operational Response: Continue to monitor weather conditions and implement operational changes if required, No action required – monitoring compliant and weather conditions favourable
