

Maules Creek Site Monitoring

 Air Quality (PM10)¹	
Average reading for 24hr period 04 March 2026 00:00 to 05 March 2026 00:00	
TEOM 01 18.00 (µg/m³)	TEOM 03 18.00 (µg/m³)
Operational Response: Continue to monitor dust levels and implement operational changes if required, No action required – monitoring compliant and weather conditions favourable	

¹ PM10: particle matter 10 micron or less in size

 Noise (LF)²		
Average reading for 24hr period 04 March 2026 to 05 March 2026		
Day: 7am-6pm 20 dB(A)	Evening 6pm-10pm 16 dB(A)	Nights 10pm-7am 16 dB(A)
Operational Response: Continue to monitor noise impacts and implement operational changes if required, No action required – monitoring compliant and weather conditions favourable		

² LF is estimated equivalent mining noise (LF = low frequency for band 20-630 HZ)

- The results are filtered to exclude the influence of excessive wind speed (> 3m/s) and rainfall,
- Monitoring results may include noise from other sources

 Weather
Weather Predictions for 05 March 2026
North West Slopes Plains for Thursday. Partly cloudy. Slight chance of a shower during this afternoon and early evening. The chance of a thunderstorm on the S slopes this afternoon. Winds NE 15 to 20 km/h increasing to 25 km/h before turning E/SE 15 to 20 km/h during the day.
Operational Response: Continue to monitor weather conditions and implement operational changes if required, No action required – monitoring compliant and weather conditions favourable
