Directors' Report

For the year ended 30 June 2017

The Directors present their report together with the consolidated financial report of Whitehaven Coal Limited ('the Company' or 'Whitehaven'), being the Company, its subsidiaries, and the Group's interest in joint operations for the year ended 30 June 2017 and the auditor's report thereon.

1. Principal activities

The principal activity of Whitehaven Coal Limited and its controlled entities (the 'Group') during the period was the development and operation of coal mines in New South Wales.

In the opinion of the directors, there were no significant changes in the state of affairs of the Group that occurred during the financial year that have not been noted in the review of operations.

2. Directors and Executives

2a. Directors

The directors of the Company at any time during or since the end of the financial year are:

Name and qualifications	Experience, special responsibilities and other directorships			
The Hon. Mark Vaile AO Chairman Non-Executive Director Appointed: 3 May 2012	As Deputy Prime Minister of Australia and Leader of the National Party from 2005 to 2007, Mark established an extensive network of contacts throughout Australia and East Asia. His focus at home was with regional Australia and particularly northern NSW. As one of Australia's longest serving Trade Ministers from 1999 through until 2006 Mark led negotiations which resulted in Free Trade Agreements being concluded with the United States of America, Singapore and Thailand as well as launching negotiations with China, Japan and ASEAN.			
	Importantly, early in his Ministerial career as the Minister for Transport and Regional Services, Mark was instrumental in the establishment of the ARTC which operates the Hunter Valley rail network.			
	Mark brings significant experience as a company director having been Chairman of Aston Resources and CBD Energy Limited, and is currently an independent Director on the boards of Virgin Australia Limited and Servcorp Limited which are both listed on the ASX. Mark is also a Director of Stamford Land Corp which is listed on the Singapore Stock Exchange, a Director Trustee of HostPlus Superfund, Chairman of Palisade Regional Infrastructure Fund and Independent Director and Chairman of SmartTrans Limited.			
John Conde AO BSc, BE (Electrical) (Hons), MBA (Dist) Deputy Chairman Non-Executive Director	John has over 30 years of broad based commercial experience across a number of industries, including the energy sector, and was chairman of the company prior to the merger with Aston Resources. John is chairman of Bupa Australia and New Zealand, Cooper Energy Limited and The McGrath Foundation. He is also president of the Commonwealth Remuneration Tribunal and a non-executive director of the Dexus Property Group. He retired as chairman of the Sydney Symphony Orchestra in May 2015. He was previously chairman of Ausgrid (formerly Energy Australia) and Destination NSW. He was formerly			
Appointed: 3 May 2007	chairman and managing director of Broadcast Investment Holdings, as well as a non-executive director of BHP Billiton Limited and Excel Coal Limited.			
Dr Julie Beeby BSc (Hons I), PhD (Physical Chemistry), MBA, FAICD Non-Executive Director	Julie has more than 25 years' experience in the minerals and petroleum industries in Australia including major Australian and US resources companies and as Chief Executive Officer of WestSide Corporation, an ASX listed, Queensland-based coal seam gas company. Julie has technical, operations and strategy expertise and has held senior and executive positions in coal mining, mining services and coal seam gas after commencing her career in coal and mineral processing research. Julie is currently the Chairman of the			
Appointed: 17 July 2015	Queensland Electricity Transmission Corporation Limited, Powerlink Queensland, and non-executive director of OZ Minerals Limited. Julie has previously held non-executive director positions on the Boards of Gloucester Coal Limited, Forge Group Limited, CRC Mining, Queensland Resources Council and Australian Coal Research			
Paul Flynn BComm, FCA	Paul has extensive experience in the mining, infrastructure, construction and energy sectors gained through 20 years as a professional advisor at Ernst & Young, Paul was formerly Chief Executive Officer			
Managing Director Appointed: 25 March 2013 Previously Non-Executive Director Appointed: 3 May 2012	and Managing Director of the Tinkler Group and was instrumental in the merger of Whitehaven Coal with Aston Resources. Paul joined the Board of Whitehaven on 3 May 2012 and assumed the role of Managing Director and CEO on 27 March 2013. As a partner for over eight years, Paul was the managing partner of Ernst & Young's Sydney office and a member of its Oceania executive team. Paul managed many of the firm's largest mining and energy clients across Australia, Asia, South and North America. Paul has also fulfilled various leadership roles with large corporations on secondment including as the CFO of a top 50 listed company.			

Tony Haggarty <i>MComm, FAICD, CPA</i> Non-Executive Director from 25 March 2013	Tony has over 30 years' experience in the development, management and financing of mining companies, and was co-founder and Managing Director of Excel Coal Limited from 1993 to 2006. Prior to this, Tony worked for BP Coal and BP Finance in Sydney and London, and for Agipcoal as the Managing Director of its Australian subsidiary. Tony was appointed to the Board of Whitehaven on 3 May 2007 and was appointed Managing Director on 17 October 2008 until 27 March 2013.
Previously Managing Director to 24 March 2013	
Appointed: 3 May 2007	
Christine McLoughlin BA, LLB (Honours), FAICD	Christine has more than 25 years' experience working in diverse and highly regulated sectors in Australia, UK and South East Asian markets. Christine has expertise in strategy, risk, stakeholder engagement
Non-Executive Director	and human resources in industries including financial services, telecommunications, health and nuclear science. Christine is currently a Director of Suncorp Group Limited, nib Holdings Ltd, Spark Infrastructure
Appointed: 3 May 2012	Group and Chairman of Venues NSW. She was formerly Chairman of the Australian Payments Council and a former Director of the Australian Nuclear Science & Technology Organisation (ANSTO), the Victorian Transport Accident Commission and Westpac insurance companies in Australia and New Zealand.
Raymond Zage	Raymond is the Managing Director and Chief Executive Officer of Farallon Capital Asia which is responsible
BSc Finance	for investing capital in Asia on behalf of Farallon Capital Management, one of the largest alternative asset managers in the world. Raymond has been involved in investments throughout Asia in various industries
Non-Executive Director	including financial services, infrastructure, manufacturing, energy and real estate. Previously Raymond
Appointed: 27 August 2013	was in the investment banking division of Goldman, Sachs & Co. in Singapore, New York and Los Angeles.

2b. Senior Executives

Paul Flynn

Managing Director and Chief Executive Officer

Refer to details set out in section 2(a) Directors on page 2.

Kevin Ball

Chief Financial Officer BComm, CA

Appointed as Chief Financial Officer of Whitehaven Coal in October 2013, Kevin Ball has over 25 years' experience working in the mineral and energy industry across coal, oil and gas and in complex consulting practices.

A finance graduate of the University of New South Wales, Kevin is a Chartered Accountant having spent 11 years with Ernst & Young at the commencement of his career predominantly in EY's natural resources group and has a graduate Diploma in Geoscience (Mineral Economics) from Macquarie University.

Timothy Burt

General Counsel & Company Secretary B.Ec, LLB (Hons) LLM

Timothy joined Whitehaven as General Counsel and Company Secretary in July 2009. He has over 20 years' ASX listed company legal, secretarial and governance experience across a range of industries. Prior to joining Whitehaven, Timothy held senior roles at ASX listed companies Boral Limited, UGL Limited and Australian National Industries Limited. He holds a Master of Laws from the University of Sydney.

Brian Cole

Executive General Manager – Project Delivery BE (Civil-H1), M Eng Science, MBA, Fellow IE Aust, C P Eng., M AIMM

Brian was appointed Executive General Manager - Project Delivery in June 2012.

Brian has more than 35 years of experience in heavy engineering projects and operations at an executive level in the energy related sector and has been focused on the Maules Creek project and other brownfields capital projects within the Whitehaven portfolio.

Most recently Brian managed the construction of the three stages of the third coal terminal in Newcastle for NCIG with a combined capital cost of circa \$2.8 billion.

Jamie Frankcombe Executive General Manager – Operations BE (Mining), MBA (Technology)

Jamie was appointed Executive General Manager - Operations in February 2013.

Jamie was previously Director Operations at Fortescue Metals Group Ltd. Prior to that he has had extensive senior experience in coal mine operations and development including as the Chief Operating Officer of PT Adaro Indonesia, Executive General Manager – Americas for Xstrata Coal and General Manager Operations for Xstrata Coal's Hunter Valley open cut operations.

Jamie holds a Bachelor of Engineering (Mining) from Wollongong University and a Master of Business Administration (Technology) from APESMA Deakin University. Additionally he holds First Class Certificate of Competency qualifications for both the NSW and Queensland coal industry.

Scott Knights

Executive General Manager – Marketing *BEcons (Hons)*

Scott was appointed Executive General Manager – Marketing in August 2014. Prior to joining Whitehaven he was Vice President Sales, Marketing and Logistics for Peabody Energy Australia. Scott has over 25 years of experience in a wide range of commercial roles including marketing, sales, logistics, management and business strategy in the commodities sector, working for Peabody Energy, Rio Tinto, PwC and Renison Goldfields Consolidated.

2c. Directors' interests

The relevant interest of each director in the shares and options issued by the Company, as notified by the directors to the Australian Securities Exchange in accordance with section 205G(1) of the Corporations Act 2001, at the date of this report is as follows:

	Ordinary shares
Mark Vaile	2,043,132
John Conde	888,620
Julie Beeby	55,000
Paul Flynn ¹	383,792
Tony Haggarty	11,934,485
Christine McLoughlin	75,000
Raymond Zage	-

1 Mr Flynn held 1,822,081 options issued by the Company as at the date of this report.

2d. Directors' meetings

The number of Directors' meetings (including meetings of Committees of Directors) and number of meetings attended by each of the Directors of the Company during the financial year are:

Director	Directors' Meetings		Audit & Risk Management Committee Meetings		Remuneration Committee Meetings		Health, Safety, Environment & Community Committee Meetings		Nomir Comr	nance & nations nittee tings
	А	В	А	в	А	В	А	В	А	в
Mark Vaile	11	11	6	6	5	5	_	_	1	1
John Conde	11	11	6	6	5	5	-	-	1	1
Julie Beeby	11	11	-	-	-	-	4	4	-	-
Paul Flynn	11	11	_	_	-	_	-	-	_	-
Tony Haggarty	11	11	6	5	-	-	4	4	-	-
Christine McLoughlin	11	11	-	-	5	5	4	4	1	1
Raymond Zage	11	11	-	-	-	_	-	-	-	-

A Number of meetings held during the time the Director held office during the year.

B Number of meetings attended.

3. Other

3a. Dividends

Paid during the year

During the year the Company did not pay any dividends.

Declared after end of year

The directors have not declared a dividend in respect of FY2017. However, the subsequent events note sets out details of a proposed distribution to shareholders which will be subject to approval by shareholders at the Company's AGM on 25 October 2017.

3b. Share options

Shares issued on exercise of options

During the reporting period no options have been exercised.

Unissued shares under options

At the date of this report there were 5,440,707 unissued ordinary shares of the Company under options. Refer to note 5.5 of the financial statements for further details of the options outstanding.

3c. Indemnification and insurance of officers

Indemnification

The Company has agreed to indemnify, to the fullest extent permitted by law, all current and former directors of the Company against liabilities that may arise from their position as directors of the Company and its controlled entities. The agreement stipulates that the Company will meet the full amount of any such liabilities, including costs and expenses.

Insurance premiums

During the financial year the Company has paid premiums in respect of directors' and officers' liability and legal expenses insurance contracts. Such insurance contracts insure persons who are or have been directors or officers of the Company or its controlled entities against certain liabilities (subject to certain exclusions).

The directors have not included details of the nature of the liabilities covered or the amount of the premium paid in respect of the directors' and officers' liability and legal expenses insurance contracts as such disclosure is prohibited under the terms of the contract.

3d. Indemnification of auditors

To the extent permitted by law, the Company has agreed to indemnify its auditors, Ernst & Young, as part of the terms of its audit engagement agreement against claims by third parties arising from the audit (for an unspecified amount). No payment has been made to indemnify Ernst & Young during or since the financial year.

3e. Rounding

The Company is of a kind referred to in ASIC Corporations Instrument 2016/191 and dated 24 March 2016 and, in accordance with that Class Order, all financial information presented in Australian dollars has been rounded to the nearest thousand unless otherwise stated.

4. Operating and financial review

Financial headlines

- Net profit after tax ("NPAT") increased to \$405.4m.
- Operating EBITDA before significant items increased by 219% to \$714.2m.
- Cash generated from operations increased by 143% to \$655.3m.
- Net debt of \$311.1m at 30 June 2017 and gearing reduced to 9%.

The following table summarises the key reconciling items between the Group's operating EBITDA before significant items and its statutory profit.

	FY2017	FY2016
WHITEHAVEN COAL LIMITED - CONSOLIDATED	\$ MILLION	\$ MILLION
Revenue	1,773.2	1,164.4
Net profit before significant items	367.2	20.5
Significant items after tax (refer to note 2.2 in the financial statements)	38.2	-
Net profit after tax	405.4	20.5
Operating EBITDA before significant items	714.2	224.1
Significant items before tax and financing (refer to note 2.2 in the financial statements)	(55.0)	-
Net interest expense (refer to note 5.2 in the financial statements)	(42.1)	(56.9)
Other financial expenses	(7.9)	(9.1)
Depreciation and amortisation	(133.9)	(130.4)
Gain on asset disposals	0.1	-
Profit before tax	475.4	27.7

The 30 June 2017 NPAT includes the impact of the following two significant items (refer to note 2.2 in the financial statements):

- A \$55.0m impairment charge in relation to early stage exploration assets.

- Recognition of additional deferred tax assets in respect of previously unrecognised income tax losses of \$76.7m.

The recognition of these items has the effect of increasing the NPAT by \$38.2m. There were no significant items recognised in FY2016.

Directors' Report (cont.)

Review of financial performance

FY2017 NPAT before significant items of \$367.2m represents an increase of \$346.7m compared to \$20.5m in FY2016. The significant turn-around in the FY2017 result was driven by a strong operating performance coupled with improved coal prices with FY2017 EBITDA before significant items of \$714.2m reflecting an increase of \$490.1m (219%) compared to \$224.1m in FY2016.

EBITDA before significant items was underpinned by EBITDA margins improving to \$46/t in FY2017 from \$14/t in FY2016. The improved EBITDA margin performance reflects increased coal prices during the year, an increase in metallurgical coal sales volumes as a proportion of total sales volumes and the enduring benefit associated with the sustainable cost reductions achieved in recent years.

The key factors that contributed to the FY2017 NPAT before significant items result for the year include:

- Strong safety performance.
- Gross revenue increased to \$1,773.2m in FY2017 from \$1,164.4m in FY2016. The increase was driven by the A\$37/t increase in A\$ realised prices to average A\$112/t in FY2017 from A\$75/t in FY2016 and by an increase in sales volumes to 15.8Mt in FY2017 from 15.5Mt in FY2016.
- The key drivers of A\$ realised prices during the period were:
 - The Newcastle GlobalCoal Index price averaged US\$81/t for high quality thermal coal in FY2017, US\$28/t above the average of US\$53/t recorded in FY2016.
 - The Group realised an average price of US\$102/t in FY2017 for its sales of metallurgical coal products. The realised price reflects a combination of quarterly benchmark linked and index based contracts.
 - The high quality of thermal coal from the Maules Creek mine which typically achieved both quality and energy premiums relative to the Newcastle GlobalCoal Index price during the period. Thermal coal sales from Narrabri, Rocglen and Tarrawonga broadly received the Index price during the year.
 - An increase in the proportion of metallurgical coal sales from 15% in FY2016 to 21% in FY2017 was underpinned by increased production of metallurgical coal at Maules Creek.

.

. . .

- A strengthened currency partially offset some of the benefits of improved prices - the A\$ increased to average 0.75 in FY2017 from an average of 0.73 in FY2016
- The increase in prices for both thermal and metallurgical coal during FY2017 reflected the return of the market to supply/ demand balance following production cuts in a number of key coal producing countries namely China, Indonesia, the USA and Australia.
- FOB costs per tonne of A\$58/t in FY2017 remain in the best cost quartile. While FOB costs per tonne have increased by \$2/t from A\$56/t in FY2016, this is largely due to the cost of producing increased metallurgical coal tonnages, the costs incurred to recover production that was lost due to wet weather in the September 2016 quarter and due to changes in the composition of the sales mix.
- Increased production from Maules Creek continues to increase the resilience of Whitehaven's portfolio both from a volume and quality perspective and helps to reduce the impact of Narrabri longwall change-outs while supporting further improvement in the utilisation of contracted rail and port capacity. Gunnedah open cuts delivered a record result at historically low operating costs.
- Selling and distribution costs reflect the benefits of larger scale operations, and utilisation of contracted infrastructure capacities.
- Administration costs were lower than the prior period.

Whitehaven's investment in the development of Maules Creek at the bottom of the coal price cycle, the ramp up of Narrabri underground and the productivity improvements exhibited at the Gunnedah open cuts have provided a solid platform for the business and ensured that the Group continues to be well positioned to capitalise on an improved environment for thermal and metallurgical coal. Maules Creek delivered production in the second half of FY2017 at an annualised run rate of 10.5Mt with best quartile costs and a premium product delivering significant premiums to the prevailing thermal prices. This is reflected in the significant contribution that Maules Creek has made to Whitehaven's FY2017 EBITDA.

Whitehaven has a policy to maintain a strong capital base so as to maintain investor, creditor and debt market confidence and to ensure that the business is well positioned to support attractive future growth opportunities.

Cash flows and capital management	FY2017	FY2016	
	\$ MILLION	\$ MILLION	
CASH FLOW SUMMARY			
Operating cash flows	607.6	171.9	
Investing cash flows	(93.7)	(93.1)

Gearing ratio ¹ (%)	9%	23%	
Leverage ² (times)	0.4	3.8	

1 Net Debt/(Net Debt plus Equity).

2 Net Debt/ EBITDA before significant items.

Cash flow and capital management commentary

Operating cash flows of \$607.6m in FY2017 increased by 254% compared to FY2016. The increase reflects both the resilience of the coal price recovery, which has seen both thermal and metallurgical coal prices being maintained at constructive levels, and excellent operational performance. Costs for FY2017 were within the best cost quartile of the industry cost curve.

The strength of the operating cash flow performance has also been underpinned by the increasing scale that Maules Creek brings to the Whitehaven portfolio. Interest payments were lower as drawn debt was reduced to \$398.3m at 30 June 2017 from \$940.8m at 30 June 2016, while investments in working capital occurred in FY2017 predominantly due to the increased sales prices in trade receivables balances.

Investing cash outflows of \$93.7m in the year ended 30 June 2017 are consistent with FY2016. Growth capital has been allocated toward procuring the Narrabri 400 metre face, completing remaining Maules

Creek project related items, main road development at Narrabri and expenditure to progress the Environmental Impact Statement (EIS) required for Government approval for an expanded Vickery mine (10Mtpa). Throughout the cycle Whitehaven has continued to allocate sustaining capital at each of its mines to maintain safe and productive operations.

Whitehaven's liquidity position strengthened considerably during FY2017. There was \$87.1m in cash and \$775.0m in undrawn facilities available at 30 June 2017. Net debt of \$311.1m at 30 June 2017 was a reduction of \$528.2m from 30 June 2016. Whitehaven remains well within the target range on all its key capital management metrics.

As a result of the strength of Whitehaven's balance sheet, its scale of operations, and its improved earnings and cash flow generation, Whitehaven is well placed to expand its operations from its existing portfolio of opportunities or to take advantage of external growth opportunities that may arise.

Consolidated equity production, sales and coal stocks

WHITEHAVEN TOTAL (000t)	FY2017	FY2016	Movement
ROM Coal Production	17,718	15,760	12%
Saleable Coal Production	15,769	15,072	5%
Sales of Produced Coal	15,487	15,432	0.4%
Sales of Purchased Coal	328	79	-
Total Coal Sales	15,815	15,511	2%
Coal Stocks at Year End	2,371	1,307	81%

Significant highlights for FY2017 include:

- ROM and saleable coal production for the year were 12% and 5% higher respectively than the prior corresponding period ("pcp").
- Coal sales of 15.8Mt were 2% higher than the pcp.
- Sales of metallurgical coal continued to grow and represented 21% of total sales for the year.
- Maules Creek delivered production in the second half FY2017 at an annualised run rate of 10.5Mt with best quartile costs.
- The high quality thermal coal from the Maules Creek mine continues to be highly valued by customers and typically achieved quality and energy premiums relative to the Newcastle GlobalCoal Index price.
- Metallurgical coal quality from Maules Creek has exceeded early expectations and continues to attract high levels of customer interest.
- At Narrabri, the installation of the first 400 metre wide panel was completed on schedule and below budget with longwall mining commencing in April.
- Full year ROM coal production records were set at Tarrawonga and Rocglen 2.7Mt and 1.6Mt respectively.

The Group's total workforce including contractors was approximately 1,500 people at the end of June 2017, making Whitehaven Coal the largest private sector employer in the north-west NSW region. Employee and contractor numbers have grown from the beginning of the year as Maules Creek continued to ramp up production.

Review of operations - safety

Providing a safe working environment for employees is critical at Whitehaven Coal and is key to the Group's improving financial performance. Whitehaven Coal provides training, equipment, resources and systems to create the safest possible work environment at each site. Building a culture of safety awareness is the foundation for continuous improvement to exceed targets and to exceed industry averages.

As part of the Company's Health and Safety Policy, Whitehaven Coal aims to:

- Achieve zero workplace injuries and illnesses
- Achieve zero plant and equipment damage
- Achieve zero environmental incidents

2017 Performance

Safety performance continued to improve during the year. Whitehaven's Total Recordable Injury Frequency Rate (TRIFR) of 7.4 recordable injuries per million hours at the end of June fell from 10.6 at June 2016.

Whitehaven's TRIFR is well below the NSW coal mining average of 14.7.

Maules Creek

Ownership: Whitehaven 75% and Operator; ICRA MC Pty Ltd (an entity associated with Itochu Corporation) 15%; J-Power Australia Pty Ltd 10%.

MAULES CREEK 100% (000t)	FY2017	FY2016	Movement
ROM Coal Production	9,729	7,826	24%
Saleable Coal Production	8,986	7,384	22%
Sales of Produced Coal	8,879	7,421	20%
Coal Stocks at Year End	636	609	4%

The ramp up of ROM coal production at Maules Creek continues on schedule with production reaching an annualised rate of 10.5Mt in the second half of FY2017. Production for the full year was at the upper end of guidance, despite the slow start to the year brought about by unusually heavy rainfall in the September quarter.

The next step in the ramp up of Maules Creek production is expected to occur early in FY2019.

Maules Creek has continued its track record of consistently delivering high quality thermal coal. Maules Creek thermal coal is one of the highest quality coals sold into the Asian seaborne market and continues to gain increased penetration with both existing and new customers, many of whom are seeking to utilise this high energy, low ash coal in new High Energy Low Emission ('HELE') technology power stations. Sales of metallurgical coal represented 26% of sales in FY2017, an increase compared to 14% in FY2016. Whitehaven is steadily executing term contracts with customers for the purchase of semi soft coking coal. Coal testing programmes are demonstrating the value in use of this low ash, low sulphur and high quality semi soft coking coal. Customer interest is expected to increase further as mining progresses to the lower seams of the Maules Creek deposit as these seams exhibit even better coking characteristics than the coal produced in the preceding two years of commercial activity.

Production guidance for FY2018 is in the range of 10.3Mt and 10.6Mt ROM coal.

Narrabri

Ownership: Whitehaven 70% and Operator; J-Power 7.5%; EDF Trading 7.5%; Upper Horn Investments Limited 7.5%; Daewoo International Corporation and Korea Resources Corporation 7.5%.

NARRABRI MINE 100% (000t)	FY2017	FY2016	Movement
ROM Coal Production	7,267	6,888	6%
Saleable Coal Production	6,987	7,269	(4%)
Sales of Produced Coal	6,823	7,532	(9%)
Coal Stocks at Year End	318	135	136%

Narrabri ROM coal production was 7.3Mt in FY2017, placing the mine as one of the most productive underground mines in Australia. Narrabri experienced some geotechnical issues in the December quarter which adversely impacted production for the year and led to a modest underperformance relative to the guidance target for the year.

An important milestone was achieved in FY2017 with the installation of the 400 metre wide longwall face which was completed on schedule and below budget. After some debottlenecking, the new longwall equipment and associated infrastructure is now operating as expected with regular 200,000 tonne production weeks achieved. Roadway development for the next panel remains on schedule for commencement of longwall mining in panel LW108 in the first half of CY2018.

Production guidance for FY2018 is in the range of 8.0Mt to 8.4Mt ROM coal. In the following two years (FY2019 and FY2020), production will be lower as the displacement caused by a fault mined through in earlier longwall panels has increased. At this stage the plan in FY2019 and FY2020 is to step the longwall around the fault, rather than attempt to mine through the fault zone due to the risk of damage and delay.

Open Cut Mines (excluding the Maules Creek Mine)

Ownership: Werris Creek Whitehaven 100%; Rocglen Whitehaven 100%; Tarrawonga Whitehaven 70% and Operator and Idemitsu 30%.

OPEN CUTS 100% (000t)	FY2017	FY2016	Movement
ROM Coal Production	6,142	5,791	6%
Saleable Coal Production	4,811	5,038	(5%)
Sales of Produced Coal	4,616	5,095	(9%)
Coal Stocks at Year End	1,886	901	109%

The Gunnedah open cut mines produced a record 6.1Mt ROM coal production in FY2017. This included 2.1Mt in the final quarter of the year. The increased production was due to a concerted effort by these operations to compensate for the adverse impact on production associated with the wet weather in the September quarter and the geotechnical issues experienced at Narrabri in the December quarter.

The strong finish to the year has resulted in an increase in ROM coal stocks at all mines. These stocks will be processed and sold during the first half of FY2018. Cost reductions have been achieved at all operations during FY2017.

Rocglen and the Gunnedah CHPP have both achieved another milestone of being three years free of injuries.

Production guidance for FY2018 is in the range of 5.0Mt and 5.4Mt ROM coal.

Vickery

Ownership: Whitehaven 100%.

Work progressed on the various studies to produce the Environmental Impact Statement (EIS) required for Government approval for an expanded Vickery mine (10Mtpa). Drafting of the EIS document and supporting documents is nearing completion. Submission of the completed EIS to the Department of Planning and Infrastructure is expected within the September quarter of CY2017. Discussions with numerous interested parties regarding the formation of a joint venture will commence following the lodgement of the EIS.

Timing for construction commencement of the Vickery project remains market dependent, but will likely occur once Maules Creek has been fully ramped up to its 13Mtpa capacity.

Exploration projects

Whitehaven has several exploration and potential development projects in Queensland and New South Wales. These are early stage exploration projects. A decision was taken to record an impairment charge for these early stage projects in FY2017 because of the change in timeframe for their likely development.

In the current market environment the Company is focused on maintaining the tenements in good standing but is limiting its spending on those projects.

Infrastructure

Rail Track

Whitehaven contracts its below rail capacity with the Australian Rail Track Corporation (ARTC). The capacity framework which governs this contract has been recently renegotiated for a further 5 year term with a material reduction in track access costs. Whitehaven continues to work with ARTC to expand effective capacity within the Gunnedah Basin without requiring additional physical infrastructure through improved operating efficiencies. The objective of this work is to improve supply chain productivity and to further reduce costs.

Rail Haulage

Whitehaven has two rail haulage contracts, one with Pacific National and one with Aurizon. These contracts have a common expiry date in 2026. These contracts provide for the haulage of up to 30Mtpa which allows for all currently projected brownfield expansions. The company is able to align planned increases in production with contract rail haulage capacity by giving notice to the rail providers of the need for additional capacity. This supports the planned increases in Whitehaven's managed production levels, whilst minimising fixed cost exposure.

Port Capacity

Whitehaven holds contracts at the Port of Newcastle – either at NCIG or at PWCS – to support planned shipments. Whitehaven will require additional port capacity for the forecast production ramp up over the next 5 years. There is currently surplus port capacity available at the port for both short term surge and long term annual requirements.

Events subsequent to reporting date

In the interval between the end of the financial year and the date of this report there has not arisen any item, transaction or event of a material and unusual nature likely, in the opinion of the directors of the Company, to affect significantly the operations of the Group, the results of those operations, or the state of affairs of the Group, in future financial years, other than the following:

Subsequent to the end of the financial period, the Group refinanced its A\$1.2 billion Senior Secured Bank Facility in August 2017 provided by a syndicate of Australian and international banks. The new facility is comprised of a \$1.0 billion drawable revolver and a \$ 0.2 billion guarantee facility. The new facility's A\$1.0 billion drawable line of credit is for general corporate purposes and has a maturity of July 2021.

Subsequent to the end of the financial period, the Group repaid a further \$100 million of debt drawn under the senior bank facility.

Subsequent to the end of the financial period, the Directors have proposed a 20 cent per share distribution to shareholders, which is expected to comprise a 14 cent capital return and a 6 cent unfranked dividend. Whitehaven is seeking a class ruling from the ATO in relation to the proposed distribution. The proposed capital return component is subject to receiving shareholder approval at Whitehaven's Annual General Meeting (AGM) in October 2017 and, if approved by shareholders, will be paid in November 2017 along with the related unfranked dividend. Further details will be provided in the Notice of Meeting for the AGM.

Directors' Report (cont.)

Outlook and likely developments

Operations

Saleable coal production guidance for FY2018 is in the range of 22Mt to 23Mt, higher than FY2017 as Maules Creek is expected to produce ROM coal at an annualised rate of 10.5Mt for the full year and ROM production from Narrabri is also expected to increase. The next ramp up step for Maules Creek is scheduled to commence early in FY2019. ROM production from Narrabri in FY2018 is expected be higher than FY2017 following the installation of the wider longwall face and the requirement for only one longwall change-out. ROM coal production for the Gunnedah open cuts is expected to return to a level more in line with historical run rates.

Maules Creek and Narrabri are tier one assets with long mine lives and industry leading low cost structures. There are opportunities to increase production at both mines in the near and medium term, while prospects also exist for life of mine extensions. These mines are now firmly established as key pillars underpinning Whitehaven's future success.

Demand

Whitehaven's high quality, clean coals continue to attract strong demand from a growing customer base in over ten countries. Whitehaven has attracted a number of new customers during FY2017 in countries such as China and Vietnam for semi soft coking coal and Malaysia for thermal coal.

Recent analysis by CRU, a respected industry consultant, indicates that demand for seaborne thermal coal will continue to grow steadily over the next five years. The growth profile incorporates declining imports by China, modest import growth by India and strong import growth from a number of developing South East Asian countries.

Pricing

Coal demand remains strong especially in Asia and is responsible for the improvement in prices for both metallurgical and thermal coal in recent weeks. The demand for thermal coal in China increased as hot weather and reduced hydro availability increased the coal burn in thermal power stations. Imports of thermal coal into the country have been higher than anticipated, and when combined with weather related constraints on supply from Indonesia and some production issues in Australia, have pushed up the price of seaborne thermal coal in the past two months. While most of these issues are likely to be resolved in coming months, the confluence of events has provided a good platform for the thermal coal price as FY2018 unfolds. In the longer term, as a number of Asian countries continue to deploy new HELE power stations the demand for high quality thermal coal will continue to grow strongly.

Following a six month period of extreme price volatility in spot metallurgical coal prices after the Queensland cyclone, metallurgical coal prices are now stabilising. The price remains well supported by strong steel production in China and a number of other countries. One area of uncertainty is the pricing mechanism for metallurgical coal types. The drawn out negotiations to settle quarterly benchmark prices for the June quarter and subsequent changes to the quarterly benchmark pricing methodology are likely to result in closer correlation between quarterly benchmark and spot index prices.

Risks relating to Whitehaven's future prospects

Whitehaven operates in the coal sector. There are many factors, both specific to Whitehaven and to the coal industry in general, which may, either individually or in combination, affect the future operating and financial performance of the Group, its prospects and/ or the value of Whitehaven. Many of the circumstances giving rise to these risks are beyond the control of the Whitehaven Directors and its management. The major risks believed to be associated with investment in Whitehaven are as follows:

Market risks

The Company's future financial performance will be impacted by future coal prices and foreign exchange rates.

The factors which affect coal prices and demand include the outcome of future sales contract negotiations, general economic activity, industrial production levels, changes in foreign exchange rates, changes in energy demand and demand for steel, changes in the supply of seaborne coal, changes in international freight rates or other transportation infrastructure and costs, the cost of other commodities and substitutes for coal, market changes in coal quality requirements and government regulation which restricts the use of coal, imposes taxation on the resources industry or otherwise affects the likely volume of sales or pricing of coal.

Sales made under export contracts are denominated in US dollars. The Company uses forward exchange contracts (FECs) to hedge some of its currency risk in line with its hedging policy.

Operating risks

The Company's coal mining operations are subject to operating risks that could result in decreased coal production which could reduce its revenues. Operational difficulties may impact the amount of coal produced at its coal mines, delay coal deliveries or increase the cost of mining for varying lengths of time. Such difficulties include (but are not limited to) weather (including flooding) and natural disasters, unexpected maintenance or technical problems, failure of key equipment, depletion of the Company's Reserves, increased or unexpected reclamation costs and interruptions due to transportation delays.

Geology risks

Resource and Reserve estimates are stated to the JORC Code and are expressions of judgement based on knowledge, experience and industry practice. There are risks associated with such estimates, including that coal mined may be of a different quality, tonnage or strip ratio from those in the estimates.

Development risks

There is a risk that circumstances (including unforeseen circumstances) may cause delays to project development, exploration milestones or other operating factors, resulting in the receipt of revenue at a date later than expected. Additionally, the construction of new projects/expansion by the Company may exceed the currently envisaged timeframe or cost for a variety of reasons outside of the control of the Company.

5. Auditor independence and non-audit services

5a. Auditor's independence declaration

The auditor's independence declaration forms part of the Directors' report for financial year ended 30 June 2017. It is set out on page 32.

5b. Non-audit services

During the year Ernst & Young, the Company's auditor, has performed certain other services in addition to their statutory duties.

The Board has considered the non-audit services provided during the year by the auditor and, in accordance with written advice provided by resolution of the Audit and Risk Management Committee, is satisfied that the provision of those non-audit services during the year by the auditor is compatible with, and did not compromise, the auditor independence requirements of the *Corporations Act 2001* for the following reasons:

- all non-audit services were subject to the corporate governance procedures adopted by the Company and have been reviewed by the Audit & Risk Management Committee to ensure they do not impact the integrity and objectivity of the auditor; and
- the non-audit services provided do not undermine the general principles relating to auditor independence as set out in APES 110
 Code of Ethics for Professional Accountants, as they did not involve reviewing or auditing the auditor's own work, acting in a management or decision making capacity for the Company, acting as an advocate for the Company or jointly sharing risks and rewards.

Details of the amounts paid to the auditor of the Company, Ernst & Young, and their related practices for non-audit services provided during the year are set out below.

	Consolidated 2017	Consolidated 2016
IN AUD	\$	\$
Non-audit services		
Ernst & Young		
Taxation services	20,000	42,712
Other non-audit services	66,100	99,500
Review of National Greenhouse Energy Reporting Act requirements	56,451	11,068
	142,551	153,280

Remuneration Report

(Audited)

Dear Shareholder,

We present our Remuneration Report for the financial year ended 30 June 2017 **(FY2017)**. The report explains our remuneration arrangements.

The Board continues to apply a fair and responsible executive remuneration framework which operates effectively to appropriately incentivise and reward senior executives to execute our strategy while being aligned with shareholder interests. Our strategy has been to build a portfolio of assets that operates in the best quartile of the coal cost curve and to develop and operate that portfolio of assets in a safe and sustainable manner. The Board believes that the current framework has been effective.

At the 2016 Annual General Meeting (AGM), shareholders voted 99.54% in favour of our Remuneration Report.

Whitehaven Coal's performance in FY2017

In FY2017 the Company was the best performing stock in the ASX200 index delivering a total shareholder return of 167%.

Managing Director and Chief Executive Officer, Paul Flynn **(CEO)**, is supported by a strong executive leadership group and the Board believes that the Company is well positioned to continue to improve its performance and to deliver value for shareholders. The Company's balance sheet strength and quality of operations underpin the confidence of the Board to recommend shareholders approve a distribution of 20 cents per share to shareholders.

The introduction of a Costs Target Hurdle into our Long Term Incentive (LTI) structure in 2014 has been effective. Whitehaven has been in the best quartile for costs of production in the three most recent financial years, and when combined with the FY2017 recovery in coal prices has led to this year's record operating profit and the retirement of a substantial amount of debt.

Remuneration outcomes for FY2017

Short Term Incentive **(STI)** awards to Executive KMP for their performance during the year were assessed between 89% and 92% of the maximum possible award. 50% of each Executive KMP's FY2017 STI award will be deferred into equity which will vest in two tranches following the completion of FY2018 and FY2019.

Three awards of the Long Term Incentive **(LTI)** were tested during FY2017. These are the first LTI awards to vest since the 2012 merger. Details are set out in this report. The Board is pleased that the hurdles have been satisfied and the LTIs vested following sustained, successful efforts in executing the Company's strategy.

Changes to remuneration framework for FY2017

Changes to Executive KMP remuneration approved by the Board for FY2017 were considered in the context of our strategy, relevant benchmarks and retaining our leadership team.

For FY2017 the total potential remuneration of our Executive KMP was increased, by increasing the STI target potential from 50% of Total Fixed Remuneration (TFR) to 100% of TFR for the CEO, to 80% for the EGM Operations and to 70% for other Executive KMP and by decreasing the possible stretch award available from 150% of an award to 125%. STI awards are delivered 50% in cash and 50% in deferred equity.

To increase the retention value of the LTI scheme and to further align the scheme with shareholders' interests, for FY2017 the Board introduced a change to LTI awards from being delivered 100% in the form of performance rights to being delivered in the form of 50% performance rights and 50% options with a market-value exercise price. All awards are subject to achieving performance targets. At the 2016 AGM shareholders voted 99.5% in favour of the CEO's LTI grant. Details of the upcoming LTI grant and hurdles for FY2018 for the CEO will again be included in the Notice for our upcoming AGM when shareholders will be asked to approve the grant.

Non-executive Directors fees

The Board had not increased Non-executive Directors fees since the 2012 merger with Aston Resources but has now reviewed Non-executive Directors fees for FY2018. For the upcoming financial year whilst the maximum aggregate Directors' fee pool will not be changed, the Board Chairman's fee has increased by \$25,000, and the Remuneration Committee and Health, Safety, Environment & Community Chairman fees and member fees have been aligned with Audit & Risk Management Committee fees to reflect the workload of those Committees.

We thank our Executive KMP and their teams for their commitment and contribution to Whitehaven. We hope shareholders find the information provided in the Remuneration Report informative, and we welcome your feedback.

Yours sincerely,

Which the

The Hon. Mark Vaile AO Chairman

Christine Meloughlin

Christine McLoughlin Chairman of the Remuneration Committee

1. Introduction

This Remuneration Report forms part of the Directors Report.

In accordance with Section 308 (3C) of the Corporations Act 2001 (Cth) (Corporations Act), the external auditors, Ernst & Young, have audited this Remuneration Report.

This report details the remuneration and fees during FY2017 of the KMP of the Company, who are listed in the table below. For the remainder of this Remuneration Report, the KMP are referred to as either Executive KMP or Non-executive Directors.

1.1 Key Management Personnel for FY2017

This Report details the remuneration during FY2017 of:

Name	Role held during FY2017	Committee positions held
NON-EXECUTIVE DIRECTO	DRS	
The Hon. Mark Vaile AO	Chairman and	Chairman of Governance & Nomination Committee
	Non-executive Director	Member of Audit & Risk Management Committee

Managing Director and Chief Executive Officer
Chief Financial Officer
General Counsel and Company Secretary
Executive General Manager - Project Delivery
Executive General Manager - Operations
Executive General Manager - Marketing

1.2 Summary of Company performance

The Remuneration Committee is of the view that the Executive Key Management Personnel (**Executive KMP**) have continued to successfully execute our strategy and that remuneration outcomes for FY2017 are aligned to company performance. In FY2017 the Executive KMP have focused on key projects and initiatives including:

- improving safety, environmental and community engagement outcomes;
- ramping up coal production, coal processing and coal sales;
- deploying the 400 metre wide longwall face at Narrabri;
- delivering industry leading cost performance;
- capitalising on improved market conditions to substantially reduce debt; and
- substantially completing the Company's submission in support of a 10mtpa operation at Vickery.

Whitehaven has capitalised on improved coal prices in FY2017 by increasing saleable production and coal sales, by improving safety and by continuing to tightly manage costs to report a record Net Profit after Tax of \$405.4m.

There were many highlights in FY2017 including:

TRIFR of 7.4 improved by 30%	Net Profit After Tax of \$405.4m
ROM Production of 23.1Mt increased by 13%	EBITDA of \$714.2m increased by 219%
Saleable Production of 20.8Mt increased by 6%	Cash generated from operations of \$655.3m increased by 143%.
Coal Sales of 20.7Mt increased by 3%	Costs of Production \$58/t within the best quartile

As a consequence of investments made by the Company since the merger in 2012 to bring Narrabri and Maules Creek coal mines on line and ramp up their production, in FY2017 Whitehaven decreased net debt by \$528m, leverage for the trailing twelve months has decreased to 0.4x EBITDA and gearing reduced to 9%. These are credit metrics that are investment grade.

Company performance for the last five years

A snapshot of key Company performance for the past five years is set out below:

	2017	2016	2015	2014	2013
Revenue (\$m's)	1,773.2	1,164.4	763.3	755.4	622.2
EBITDA (\$m's)	714.2	224.1	130.3	90.4	17.1
Profit/(loss) attributable to the group (\$m's)	405.4	20.5	(342.7)	(38.4)	(88.7)
Share price at year end (dollars per share)	\$2.87	\$1.08	\$1.32	\$1.43	\$2.30 ¹
Basic EPS (cents per share)	41.2	2.1	(33.3)	(3.9)	(9.0)
Diluted EPS (cents per share)	40.7	2.1	(33.3)	(3.9)	(9.0)
Dividends paid (cents per share)	-	-	-	-	3.0
Total Reportable Injury Frequency Rate (TRIFR)	7.4	10.6	11.3	14.1	20.1
Environmental Enforcement Action Frequency Rate (EEAFR) ²	4.2	8.1	2.9	1.9	2.6
Saleable Production - Mt	20.8	19.7	11.3	8.2	6.6

1 The opening share price for 2013 was \$4.15.

2 Elevated as a KPI for STI in FY2017, an Environmental Enforcement Action is defined as a warning letter, an official caution, an order, a penalty or a prosecution. Where a single piece of enforcement correspondence notes a breach of more than one approval/licence condition, each breach is counted separately.

2. Remuneration Governance

This section describes the role of the Board, Remuneration Committee and external remuneration advisers when making remuneration decisions, and sets out an overview of the principles and policies that underpin the Company's remuneration framework.

2.1 Role of the Board and Remuneration Committee

The Board is responsible for ensuring that the Company's remuneration structures are equitable and aligned with the long-term interests of the Company and its shareholders. Consistent with this responsibility, the Board has established a Remuneration Committee, whose role is to:

- review and approve the remuneration of the Executive KMP;
- review and approve the remuneration policies and practices for the Group generally, including incentive plans and other benefits; and
- review and make recommendations to the Board regarding the remuneration of Non-executive Directors.

The Remuneration Committee comprises three Non-executive Directors: Christine McLoughlin (Committee Chairman), John Conde, and Mark Vaile. The Remuneration Committee has a formal charter, which sets out its roles and responsibilities, composition structure and membership requirements. A copy of this charter can be viewed on Whitehaven's website.

Further information regarding the Remuneration Committee's role, responsibilities and membership is set out in the Company's Corporate Governance Statement.

2.2 Use of external remuneration advisors

From time to time, the Remuneration Committee seeks and considers advice from external advisors who are engaged by and report directly to the Remuneration Committee. Such advice will typically cover Non-executive Director fees, Executive KMP remuneration and advice in relation to equity plans.

The Corporations Act requires companies to disclose specific details regarding the use of remuneration consultants. The mandatory disclosure requirements only apply to those advisers that provide a 'remuneration recommendation' as defined in the Corporations Act. The Committee did not receive any remuneration recommendations in FY2017.

2.3 Executive KMP remuneration principles and framework

The Company's Executive KMP remuneration framework is based on the following core principles:

- to ensure the Company's remuneration structures are equitable and aligned with the long-term interests of the Company and its shareholders, having regard to relevant Company policies;
- to attract and retain skilled executives;
- to structure short and long term incentives that are challenging and linked to the creation of sustainable shareholder returns; and
- to ensure any termination benefits are justified and appropriate.

These principles are reflected in the Company's remuneration framework, which is comprised of both fixed and at-risk remuneration components as indicated below.

Details of each of these components and how they applied during FY2017 are described in the tables below and in section 3.

Fixed remuneration (TFR)	At-risk STI	At-risk LTI
 includes salary and superannuation 	- determined based on a mix of financial	- provides the Remuneration Committee
 reviewed annually by the 	and non-financial measures	with the flexibility to determine the nature, terms and conditions of the grant
Remuneration Committee	- STI opportunity is set between 70%	each year
 benchmarked against peer companies 	and 100% of TFR for target performance and between 87.5% and 125% of TFR for	 operated in FY2017 as an award of 50%
 influenced by individual performance and experience 	stretch performance	performance rights and 50% options (i.e.
and experience	 50% of STI is delivered as cash and 50% is deferred into rights to receive shares in the Company subject to meeting service based vesting conditions (with vesting 	a right to receive a share for no cost or an option to acquire a share on payment of an exercise price, in each case if specified performance hurdles are satisfied)
	periods of 12 and 24 months)	- the face value of the LTI opportunity
	- ability of the Remuneration Committee to reduce the number of deferred equity	is currently set between 80% and 100% of TFR

1 As a % of TFR.

3. Remuneration of the Executive KMP for FY2017

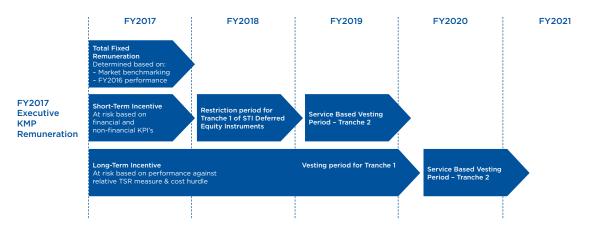

This section describes in greater detail the different components of Executive KMP remuneration for FY2017.

3.1 Mix and timing of Executive KMP remuneration

Executive KMP remuneration is delivered as a mix of fixed and at-risk remuneration. At-risk remuneration can be earned through both STI and LTI and is delivered to Executive KMP over multiyear timeframes to create a layered retention effect and to encourage sustained performance.

The graphs below illustrate the remuneration mix for Executive KMP for FY2017 (assuming Target performance for at-risk components).

The diagram below shows timing for determining and delivering Executive KMP remuneration for FY2017:

3.2 Benchmarking total remuneration

While benchmarking is a useful starting point, it is only one input used by the Board when determining total remuneration for Executive KMP. Remuneration is benchmarked against an appropriate market comparator group adopted by the Board.

The market comparator group consists of Australian listed companies, which have been identified as relevant competitors of Whitehaven that operate in similar business environments.

The Board considers company size, complexity and business challenges when it builds its remuneration comparator group.

The objective of the Board's positioning is to meet the market so as to attract and retain a leading management team while still ensuring appropriate restraint in respect of executive remuneration.

Actual market positioning for each individual may deviate from the positioning policy (above or below) due to considerations such as internal relativities, experience, tenure in role, individual performance and retention considerations.

3.3 Fixed remuneration

Fixed remuneration received by Executive KMP is subject to approval by the Remuneration Committee. Fixed remuneration is comprised of base salary and superannuation. In line with Company policy and executives' service agreements, remuneration levels are reviewed annually based on market benchmarking and individual performance.

Fixed remuneration will typically be positioned between the 50th and 75th percentile of the market comparator group adopted by the Board.

3.4 STI awards and structure for FY2017

The terms of the STI that applied during FY2017 were:

who participated.	All Executive KMP.

What performance level was achieved?

A snapshot of the performance levels achieved for FY2017 is set out below:

Performance condition ¹	YoY ²	Actual	Outcome
Safety (TRIFR)	30%	7.4	Stretch
NPAT ³	1,691%	\$367.2m	Stretch
ROM production	13%	23.1Mt	Between Gateway and Target
FOB cost per saleable tonne	4%	\$58/t	Target
Environmental (EEAFR)	48%	4.2	Stretch

1 Excludes projects KPI's and individual leadership KPIs.

2 Year on year change.

3 Before significant items.

Details in relation to each KPI are set out below.

Safety

The emphasis on a safe working environment has continued to drive a sustained reduction in the TRIFR. The Whitehaven view that "tonnes cannot come at the expense of safety" is embedded in the Company. Our operations have performed very safely – our TRIFR of 7.4 is superior to the NSW coal industry average, and is a 30% improvement when compared with FY2016. The progress of the Company to improve safety processes and standards supports our aspirational goal of being the industry leader in safety. The overall result achieved was at stretch.

NPAT

While difficult operating conditions affected both the open cut and the underground mines, tight cost control was enforced. Gunnedah basin coal quality, and particularly the quality of the Maules Creek products, assisted the Group's marketing team to penetrate new markets, win new customers, win quality adjustments to price which helped to deliver substantial value from the FY2017 rally in coal prices and deliver a record operating profit for the Group.

The reported NPAT before significant items of \$367.2m exceeded the stretch target.

ROM production (managed)

In FY2017, open cut ROM coal production was adversely impact by a wetter than usual year as well as by geological issues at Narrabri in the December quarter. Despite the impact of these factors managed ROM production of 23.1Mt for the year was a 13% increase year on year. Gunnedah open cut mines exceeded their production targets for the year, Maules Creek met its production target however Narrabri was below its target. The overall result was between gateway and target.

FOB cost per saleable tonne

Our goal continues to be to maintain low, industry leading unit costs.

Following a wetter than usual September quarter and below trend production rates at Narrabri underground mine in the December quarter, unit costs for the year rose – principally as a result of the drive in the second half of FY2017 to recover the deferred tonnes by accelerating production from higher cost operations to take advantage of the improved coal price environment. Consequently, unit costs for FY2017 of \$58/t were 4% higher than the previous year. Unit costs continue to be in the best quartile and in line with business plans. The overall result was at target.

Environmental

This year the Board elevated the operational environmental KPI into the Executive KMP STI programme. The Board recognises the importance of compliance with environmental approval conditions to maintaining the Group's standing in the community. The Group strives to adopt and achieve industry best practice. The EEAFR for FY2017 represented a 48% improvement year on year falling to 4.2 incidents per million man hours worked from the previous year. The outcome represented a stretch result.

Individual Leadership KPIs

The leadership performance of the CEO is assessed annually by the Board. Awards to individual Executive KMP ranged from at target to stretch. A stretch result was awarded to the CEO.

3.4 STI awards and structure for FY2017 (cont.)

How will the STI be delivered? 50% of the STI award will be paid to the Executive KMP in cash in September 2017. The remaining 50% of the STI award will be deferred into rights to receive Whitehaven ordinary shares (**Deferred Equity**), which will vest and become exercisable subject to meeting service conditions. In accordance with the service conditions, half of the Deferred Equity will vest and become exercisable following the completion of FY2018, while the other half will vest and become exercisable following the completion of FY2018.

There is no exercise price payable upon vesting or exercise of Deferred Equity. Upon exercise of Deferred Equity, each right entitles the recipient to one ordinary share in the Company. Vested Deferred Equity that has not been exercised by 16 August 2027 (the expiry date) will automatically be exercised.

Deferred Equity will not vest if the Executive KMP resigns or is terminated for cause or the Board applies its discretion to clawback some or all of the Deferred Equity.

STI Awards do not have any dividend or voting rights prior to vesting and exercise. However, following exercise of vested STI awards the recipient is entitled to receive a dividend equivalent payment in respect of the period between vesting and exercise (in recognition of the fact that they are entitled to receive ordinary fully paid shares in the Company at any time from vesting). Any dividend equivalent payment made to participants may be made in cash or provided as additional fully paid ordinary shares in the Company, as determined by the Board.

Executive KMP are required to comply with the Company's securities trading policy in respect of their Deferred Equity, which includes a prohibition on hedging or otherwise protecting the value of their unvested STI awards. In the event of a takeover or any proposed transaction that, in the Board's opinion, is likely to result in a change of control, the Deferred Equity will vest and become exercisable.

3.5 LTI awards and structure for FY2017

The terms of the FY2017 LTI grants to Executive KMP were:

Who participated?	All Executive KMP.
How will LTI be delivered?	FY2017 LTI Awards that vest will be delivered half in the form of performance rights, being rights to receive ordinary shares at no cost, and half in the form of options to acquire shares on payment of a market-value exercise price, in each case subject to meeting performance conditions and exercise by the Executive KMP.
	The options component was introduced in FY2017 to improve the retention effect of the LTI awards, and to further improve alignment with shareholder interests.
What was the value of LTI	The value of LTI awards granted to the Executive KMP for FY2017 remain unchanged from the previous year (i.e. the precentages of TFR – refer section 2.3).
awards granted?	The CEO was granted LTI awards with a face value equal to 100% of his TFR and the EGM Operations was granted LTI awards with a face value equal to 90% of his TFR. Other Executive KMP were granted LTI awards with a face value equa to 80% of their TFR.
	LTI awards were granted half in performance rights and half in options. The number of performance rights granted was determined with reference to the volume weighted average price of the Company's shares over the 20 trading day period commencing 10 trading days prior to 30 June 2016. The number of options granted was calculated by dividing 50% of the total LTI award value for each Executive KMP by the fair value of an option as determined by an independent third party using the Black-Scholes methodology. No discount was applied to the valuation in respect of the probability of the performance conditions being met. Shareholder approval was obtained at the 2016 Annual General Meeting for the FY2017 grant of LTI awards to the CEO.
What is the exercise price for	There is no exercise price payable on vesting or exercise of the performance rights. On exercise, each performance right entitles the recipient to one ordinary share in the Company.
LTI awards?	LTI awards that are delivered as options have an exercise price of \$1.21, (being the volume weighted average price of the Company's shares over the 20 trading day period commencing 10 trading days prior to 30 June 2016).
	Vested rights will have a last date for exercise that is 10 years following the grant date while vested options will have a last date for exercise up to 5 years following the grant date (Last Exercise Dates). On these Last Exercise Dates, vested but unexercised rights will be automatically exercised and vested but unexercised options will lapse.

What are the	The LTI award was split into the	following components:			
performance conditions? 3.5 LTI awards and structure for FY2017 (cont.)

How will the performance condition be calculated for the Costs Target Awards? The Remuneration Committee has set the LTI Costs Target Hurdle having regard to the Company's budgeted cost forecasts and to the coal industry cost curve as measured by a recognised expert. The Board is satisfied that the LTI Costs Target Hurdle is challenging and that achievement of the performance condition will place the Company in the best cost quartile of the current coal industry cost curve.

Testing will occur following the completion of FY2019 based on the average costs achieved on a Company-wide basis over the 12 month period from 1 July 2018 to 30 June 2019. Full vesting will only occur if the Board is satisfied that performance meets or exceeds the Maximum as set out below. The Board may, where it is appropriate to do so, revise the targets below to take account of mergers, acquisitions and divestments or other exceptional circumstances.

Vesting will occur based on the following schedule:

- Maximum or above 100% of the Costs Target Awards vest;
- Between Gateway and Maximum vesting will occur on a pro rata straight line basis up to maximum performance;
- Gateway 50% of the Costs Target Awards vest; and
- Below Gateway no Costs Target Awards vest.

Due to the commercially sensitive nature of this hurdle, the exact target will not be disclosed until the year of testing. However, retrospective disclosure of the outcomes against the target will be provided in the Remuneration Report for the year of testing.

To the extent that the Costs Target Hurdle is satisfied at the end of FY2019:

- 50% of the Costs Target Awards that vest will become exercisable; and
- The remaining 50% will be subject to a further one year service condition prior to vesting and becoming exercisable.

Notwithstanding the vesting schedule above, the Board retains discretion to lapse any or all Costs Target Awards if the Board considers that vesting would be inappropriate in light of the intent and purpose of the target.

Re-testing	All performance awards that do not vest following testing will lapse immediately. There is no re-testing of awards that do not vest.
Do the	LTI Awards do not have any dividend or voting rights prior to vesting and exercise.
performance rights and options attract dividend and voting rights?	Upon exercise of vested LTI Awards the recipient is entitled to receive a dividend equivalent payment in respect of the period between vesting and exercise (in recognition of the fact that they are entitled to receive ordinary fully paid shares in the Company at any time from vesting). Any dividend equivalent payment made to participants may be made in cash or provided as additional fully paid ordinary shares in the Company, as determined by the Board.
	Shares allocated on exercise of performance rights and options rank equally with other ordinary shares on issue, including in relation to dividend and voting rights. Participants are required to comply with the Company's securities trading policy in respect of their performance rights, options and any shares they receive upon exercise. They are prohibited from hedging or otherwise protecting the value of their performance rights and options.
What happens in the event of a change in control?	In the event of a takeover bid or other transaction, event or state of affairs that in the Board's opinion is likely to result ir a change in control of the Company, the Board has discretion to determine that vesting of some or all of any unvested performance awards should be accelerated.
What happens	In general, unless the Board determines otherwise, where an executive's employment is terminated:
if an executive ceases	- for cause or due to resignation all unvested performance awards will lapse; or
employment during the performance	 by mutual agreement with the Company: unvested performance awards will remain on foot and subject to the original performance hurdle. However, the Board may at its discretion determine to lapse any or all of the unvested performance awards and ordinarily, in the case of a resignation, would be expected to do so; or
period?	 for any other reason: unvested performance awards will remain on foot and subject to the original performance hurdle, with Board discretion to determine that some of the performance awards (up to a pro rata portion based on how much of the performance period remains) will lapse. The performance awards that remain on foot will be tested in the normal course following the end of the relevant performance period.

3.6 Executive KMP realised remuneration outcomes

As set out in Section 1.2 the Remuneration Committee is of the view that the Executive KMP have continued to successfully execute our strategy. The table below is designed to give shareholders a better understanding of the actual remuneration outcomes for Executive KMP in FY2017. It includes:

- Fixed remuneration earned in FY2017;
- STI earned in respect of FY2017 performance (including cash payable in September 2017 and Deferred Equity for FY2017 which may vest and become exercisable in later years);
- LTI that reached the end of its performance period in FY2017 including the impact of share price appreciation between the grant date and the test date;
- any termination benefits provided in FY2017; and
- any non-monetary benefits provided to Executive KMP in FY2017 (including fringe benefits).

The amounts disclosed in the table, while not in accordance with accounting standards, are considered more helpful for shareholders to demonstrate the linkage between Company performance and remuneration outcomes for executives for FY2017.

Executive KMP	TFR ¹	STI ² paid	LTI ³ Vested at face value of award	Other⁵	Total remuneration	FY2017 Deferred equity STI ⁶	Vested LTI ⁷ share price appreciation	Total
Paul Flynn	1,352,520	773,942	832,001	12,500	2,970,963	773,942	587,251	4,332,156
Kevin Ball	612,000	245,036	251,817	-	1,108,853	245,036	204,522	1,558,411
Timothy Burt	520,200	201,541	377,336	12,500	1,111,577	201,541	180,250	1,493,368
Brian Cole	676,260	264,141	502,727	10,432	1,453,560	264,141	233,671	1,951,372
Jamie Frankcombe	910,350	410,365	518,001	12,500	1,851,216	410,365	378,971	2,640,552
Scott Knights	525,000	210,292	180,000	-	915,292	210,292	171,371	1,296,955

1 Fixed remuneration comprises base salary and superannuation.

2 STI represents the amount of cash STI that each Executive KMP will be paid in September 2017 based on FY2017 performance. Refer to section 3.4 and section 3.7 for further details.

3 LTI represents LTI awards for which the test period was in FY2017 and which have vested for awards made between 2012 and 2014. The amounts shown are the face value of the awards at grant. Refer to section 3.8 for further details.

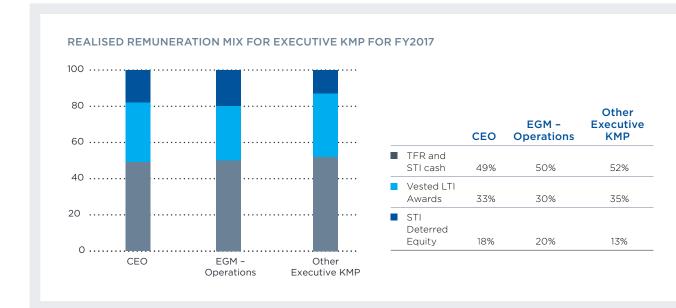

4 There were no cessation payments during FY2017.

5 Other includes parking, motor vehicle benefits and other similar items.

6 Deferred Equity STI refers to the amount of STI deferred into rights that are the subject to further service based performance conditions. Whilst not yet granted, the STI is expected to be issued at a VWAP of \$2.85. It is expected that rights issued under the STI will vest and become exerciseable following the completion of FY2018 and FY2019. Refer to Section 3.4 for further details.

7 LTI Share Price Appreciation is the amount of the Executive KMP LTI award delivered by an appreciation between the face value VWAP of a share at the time of the award being granted and the VWAP of a share at the award test date for those awards which vested. Refer to section 3.8 for further details.

The graphs below illustrate how the remuneration mix for Executive KMP for FY2017 was delivered – approximately half in cash with the balance awarded in equity or equity which is deferred for up to two years.

3.7 Executive KMP STI outcomes in FY2017

The individual STI outcome for each Executive KMP is set out in the table below.

		STI earned (\$A)	Percentage of	Percentage of	
Executive KMP	Paid as cash	Deferred equity	Total	maximum STI received	maximum STI forfeited
	\$	\$	\$		
Paul Flynn	773,942	773,942	1,547,884	92%	8%
Kevin Ball	245,036	245,036	490,072	92%	8%
Timothy Burt	201,541	201,541	403,082	89%	11%
Brian Cole	264,141	264,141	528,282	89%	11%
Jamie Frankcombe	410,365	410,365	820,730	90%	10%
Scott Knights	210,292	210,292	420,584	92%	8%

Details of the remuneration of KMP prepared in accordance with statutory obligations and accounting standards are contained in section 5 of this Remuneration Report.

3.8 Executive KMP LTI outcomes in FY2017

This is the first year since the 2012 merger that LTI awards have vested. The Board believes that the Company is well positioned to continue to improve its performance and to deliver value for shareholders. In FY2017 the Company was the best performing stock in the ASX200 index delivering a total shareholder return of 167%. The Company's balance sheet strength and quality of operations underpin the Board's confidence to propose a return of capital to shareholders in 2017.

The table below sets out the LTI awards that were tested in FY2017 (or for which the test period concluded on 30 June 2017) and the results of the relevant test.

				Outcomes		
LTI Year	Tranche	Test type	Performance	Vested	Lapsed	
2012	3 of 3	Relative TSR	10th in 23	68%	32%	 TSR of 167% #1 ranked in
2013	2 of 2	Relative TSR	10th in 21	48%	52%	the ASX200
2014	1 of 2	Relative TSR	2nd in 21	100%	0%	index for
2014	1 of 1	Costs Hurdle	\$58/t Actual \$64/t Target	100%	0%	2017

Costs Hurdle Target

In 2014, after considering the company's three year operating plan together with information provided by a recognised industry expert, the Board set the Gateway and Target for FY2017. Saleable production in FY2014 was 8.2Mt while costs for FY2014 were \$69/tonne. The Gateway was determined as the entry point into the best cost quartile, while the Target of \$64/t was determined as being within the best cost quartile. The FY2017 Target was set \$5/t below the previous year while expecting that FY2017 saleable production would be almost double that of FY2013.

The actual cost result of \$58/t for FY2017 has bettered the Target by \$6/t. Management's efforts between 2014 and 2017 to improve the cost structure have resulted in FY2017 costs finishing within the best cost quartile and as a result the Board approved an at Target award. 50% of costs hurdle target awards vest immediately while the remaining 50% are subject to a further service based vesting period of one year.

2 VWAP at grant date for Mr Flynn was \$2.20 based on commencement date of 25 March 2013 as CEO.

4. Executive KMP employment contracts

The following section sets out an overview of key terms of employment for the Executive KMP, as provided in their service agreements.

All Executive KMP contracts give the Company discretion to make payment in lieu of notice. No notice is required where termination is for cause. The contracts do not provide for any termination payments other than payment in lieu of notice.

Treatment of unvested incentives is dealt with in accordance with the terms of grant. In general, under the STI and LTI arrangements, unvested entitlements will be forfeited where an executive is terminated for cause or, subject to the Board's discretion, where they resign. In all other circumstances where the Board considers the executive to be a 'good leaver', outgoing executives will generally retain their entitlements (subject to any applicable performance conditions in the case of LTI arrangements).

Managing Director

Paul Flynn was appointed as Managing Director and CEO of the Company on 27 March 2013. This table outlines the key terms of Mr Flynn's contract of employment.

Fixed remuneration	Mr Flynn's annual TFR for FY2018 of \$1,352,520 is unchanged from FY2017. It includes salary, superannuation contributions, and any components under Whitehaven's salary packaging guidelines and all Director fees. TFR is reviewed annually.
Short term incentive	Mr Flynn is eligible to participate in the annual STI plan, as described in section 3.4. At Target performance, his FY2018 STI opportunity is 100% of TFR (FY2017: 100%), with up to 125% of TFR for Stretch performance (FY2017:125%).
Long term incentive	Mr Flynn is eligible to participate in the LTI plan as described in section 3.5, and subject to receiving required or appropriate shareholder approval. Mr Flynn's LTI grant will be 100% of his TFR for FY2018 (FY2017: 100%).
Other key terms	Other key terms of Mr Flynn's service agreement include the following:
	 his employment is ongoing, subject to twelve months' notice of termination by Whitehaven or six months' notice of termination by Mr Flynn
	 the Company may terminate without notice in certain circumstances, including serious misconduct or negligence in the performance of duties. Mr Flynn may terminate immediately in the case of fundamental change to his role (i.e. there is a substantial diminution in his responsibilities), in which case his entitlements will be the same as if the Company terminated him without cause
	 the consequences for unvested incentive awards on termination of Mr Flynn's employment will be in accordance with the Company's STI and LTI plans.
	Mr Flynn will have post-employment restraints for a period of three months. No additional amounts will be payable in respect of this restraint period.

Other Executive KMP contracts

A summary of the notice periods and key terms of the current Executive KMP contracts are set out in the table below. All of the contracts below are of ongoing duration.

Name and position (at year-end)	Notice	
Kevin Ball	3 months by employee	
Chief Financial Officer Appointed 16 December 2013	6 months by the Company	
Timothy Burt	3 months by employee	
General Counsel and Joint Company Secretary Appointed 29 July 2009	12 months by the Company	
Brian Cole Executive General Manager - Project Delivery Appointed 1 July 2012	6 months by employee or the Company	
Jamie Frankcombe	3 months by employee	
Executive General Manager – Operations Appointed 4 February 2013	6 months by the Company	
Scott Knights Executive General Manager - Marketing Appointed 18 August 2014	6 months by employee or the Company	

5. Executive KMP remuneration tables

- A The amounts disclosed as non-monetary benefits relate to car spaces, motor vehicle benefits and other similar items.
- **B** Comprises the cash component of current year STI (Refer to section 3.6 and section 3.7 for details) and the fair value at each grant date of STI Deferred Equity expensed over the service based vesting conditions. The fair value for STI grants is based on the volume weighted average price of Whitehaven shares over the 20 trading day period commencing 10 trading days prior to 30 June of each respective grant.
- C The fair value for LTI performance rights granted to the KMP is based on the fair value at each grant date. The factors and assumptions used in determining the fair value are set out in note 5.5 to the financial statements.

5.2 STI deferred equity awards made in FY2017

Details of the Deferred Equity component arising from FY2016 Executive KMP STI award performance granted in FY2017 are set out below.

Executive KMP	Number of rights granted	Performance hurdle ¹	Fair value per right at grant date ²	Latest vesting date ³
Paul Flynn	95,709	Service	\$1.21	August 2017
	95,708	Service	\$1.21	August 2018
Kevin Ball	41,801	Service	\$1.21	August 2017
	41,801	Service	\$1.21	August 2018
Timothy Burt	36,986	Service	\$1.21	August 2017
	36,985	Service	\$1.21	August 2018
Brian Cole	44,136	Service	\$1.21	August 2017
	44,135	Service	\$1.21	August 2018
Jamie Frankcombe	64,724	Service	\$1.21	August 2017
	64,724	Service	\$1.21	August 2018
Scott Knights	34,317	Service	\$1.21	August 2017
	34,317	Service	\$1.21	August 2018

1 The Deferred Equity component of FY2016 STI is subject to service conditions of one and two years, respectively. There is no exercise price payable on vesting or exercise of the Deferred Equity rights. On exercise of Deferred Equity, each right entitles the recipient to one ordinary share in the Company. Vested Deferred Equity rights that have not been exercised by 13 August 2026 (Last Exercise Date) will automatically be exercised.

2 The fair value for awards granted to the Executive KMP is based on the total deferred portion of STI divided by the volume weighted average price of Whitehaven shares over the 20 trading day period commencing 10 trading days prior to 30 June 2016 being \$1.21.

3 The Vesting Dates for Deferred Equity rights are the respective dates when the financial results for each of FY2017 and FY2018 are released to the market.

5.3 LTI awards made in FY2017

A summary of the LTI awards for FY2017 (i.e. the value and the fair value of the LTI granted to each Executive KMP) is set out in the table below.

Executive KMP	Number of performance rights granted	Number of options granted	Value of performance rights grant	Value of options grant	Fair value of performance rights at grant date	Fair value of options at grant date
			\$	\$	\$	\$
Paul Flynn	558,893	1,822,081	676,260	676,260	1,331,563	2,906,219
Kevin Ball	202,315	659,577	244,800	244,800	482,015	1,052,025
Timothy Burt	171,967	560,641	208,080	208,080	409,711	894,222
Brian Cole	223,558	728,833	270,504	270,504	532,627	1,162,489
Jamie Frankcombe	338,560	1,103,761	409,658	409,657	806,619	1,760,499
Scott Knights	173,554	565,814	210,000	210,000	413,493	902,473

The value of the LTI performance rights was calculated based on value of grant using the volume weighted average price of Whitehaven shares over the 20 trading day period commencing 10 trading days prior to 1 July 2016, being \$1.21. The value of the LTI options grant represents the face value of the grant at the start of the performance period.

The fair value for LTI performance rights and options granted to the Executive KMP was based on the fair value at 17 March 2017 being the grant date. The factors and assumptions used in determining the fair value are set out in note 5.5 to the financial statements. Each option has an exercise price of \$1.21.

5.3 LTI awards made in FY2017 (cont.)

Details of the LTI awards which were granted to Executive KMP on 17 March 2017 are shown below:

Executive KMP	Number of rights granted	Number of options granted	Performance hurdle	Fair value per right at grant date ¹	Fair value per option at grant date ¹	Latest Vesting date
Paul Flynn	139,724	455,521	TSR	\$2.31	\$1.58	30 June 2019
	139,723	455,520	TSR	\$2.20	\$1.56	30 June 2020

	55,889	182,208	TSR	\$2.20	\$1.56	30 June 2020
	111,779	364,416	Costs hurdle ²	\$2.56	\$1.64	30 June 2019
			Costs hurdle ²	\$2.46	\$1.60	30 June 2020
Jamie Frankcombe	84,640	275,941	TSR	\$2.31	\$1.58	30 June 2019
	84,640	275,940	TSR	\$2.20	\$1.56	30 June 2020
	169,280	551,880	Costs hurdle ²	\$2.56	\$1.64	30 June 2019
			Costs hurdle ²	\$2.46	\$1.60	30 June 2020
Scott Knights	43,389	141,454	TSR	\$2.31	\$1.58	30 June 2019
	43,388	141,453	TSR	\$2.20	\$1.56	30 June 2020
	86,777	282,907	Costs hurdle ²	\$2.56	\$1.64	30 June 2019
			Costs hurdle ²	\$2.46	\$1.60	30 June 2020

1 The fair value for awards granted to the Executive KMP is based on the fair value at 17 March 2017 being the grant date. The factors and assumptions used in determining the fair value are set out in note 5.5 to the financial statements. The options have an exercise price of \$1.21.

2 To the extent that the Costs Target Hurdle is satisfied at the end of FY2019, 50% of the Costs Target Awards will vest and become exercisable immediately and the remaining 50% will continue on foot, subject to a further one year service condition.

6. Non-Executive Director remuneration

This section explains the fees paid to Non-executive Directors during FY2017.

6.1 Setting Non-executive Director fees

Non-executive Directors fees are designed to ensure that the Company can attract and retain suitably qualified and experienced Non-executive Directors.

Non-executive Directors do not receive shares, share options or any performance-related incentives as part of their fees from the Company. Although there is no formal minimum shareholding, Non-executive Directors are strongly encouraged to hold shares.

Non-executive Directors are also entitled to be reimbursed for travel and other expenses reasonably incurred when attending meetings of the Board or in connection with the business of the Company.

The Remuneration Committee reviews and makes recommendations to the Board with respect to Non-executive Directors' fees and Committee fees.

In 2012 the shareholders approved a total aggregate maximum amount of Non-executive Directors' fees of \$2,500,000 per annum. No change is being sought to the total aggregate Non-executive Directors' fee pool for FY2018.

6.2 Current Non-executive Director fee levels and fee pool

The table below sets out the Board and Committee fees in Australian dollars for FY2018.

The Board has reviewed Non-executive Directors fees for FY2018 against the market. The company had not increased Directors fees since the 2012 merger. For the upcoming financial year the Board Chairman's fee has been increased by \$25,000, and the Remuneration Committee and Health, Safety, Environment & Community Committee Chairman and member fees have been aligned with Audit & Risk Management Committee fees to reflect the workload of those Committees.

	Chairman	Deputy Chairman	Member
Board	\$375,000 ¹	\$262,500 ¹	\$140,000
Audit & Risk Management Committee	\$40,000	-	\$20,000
Remuneration Committee	\$40,000	-	\$20,000
Governance & Nominations Committee	No fee	-	No fee
Health, Safety, Environment & Community Committee	\$40,000	-	\$20,000

1 The Chairman and Deputy Chairman of the Board do not receive Committee fees in addition to their Board fees.

The fees set out above exclude mandatory statutory superannuation contributions made on behalf of the Non-executive Directors.

In addition to the meetings that the Non-executive Directors attended (as shown on page 4), the Non-executive Directors participated in site visits to mines, coal handling and preparation plants and participated in the Company's annual safety day.

6.3 Non-executive Director fees – statutory disclosures

The statutory disclosures required under the Corporations Act and in accordance with the Accounting Standards are set out in the table below.

		Shor	t-term benef	its	Post-employ	ment benefits	- Total fees for	
In AUD	FY	Board & Committee fees	Non- monetary benefits	Other benefits (non-cash)	Super- annuation benefits	Termination benefits	services as a Non-executive Director

	2016	1,135,244	-	-	88,278	-	1,223,522	

1 Appointed 17 July 2015.

2 Mr Zage elected not to receive any Board & Committee fees in FY2017 and FY2016.

3 Resigned 16 July 2015.

7. Related party transactions and additional disclosures

7.1 Loans with Executive KMP and Non-executive Directors

There were no loans outstanding to any Executive KMP or any Non-executive Director or their related parties, at any time in the current or prior reporting periods.

7.2 Other KMP transactions

Apart from the details disclosed in this report, no Executive KMP or Non-executive Director or their related parties have entered into a material contract with the consolidated entity since the end of the previous financial year and there were no material contracts involving those people's interests existing at year end.

7.3 Movement in options and rights over equity instruments held by Executive KMP

The movement during the reporting period, by number and value of equity instruments in the Company held by each Executive KMP is detailed below.

Executive KMP	Instrument	Balance as at 1 July 2016 (number)	Granted (number)	Granted (value)	Vested during the year (number)	Exercised (number)	Exercised (value)	Lapsed (number)	Lapsed (year of grant)	Balance as at 30 June 2017 (number)	Vested and exercisable at 30 June 2017

Scott Knights	Performance Rights (LTI)	553,552	173,554	413,493	_	-	-	-	-	727,106	-
	Options (LTI)	-	565,814	902,473	-	-		-	-	565,814	-
	Deferred Rights (STI)	79,530	68,634	83,047	51,127	51,127	65,954	-	-	97,037	-

(A) The number of rights granted during FY2017 includes:

- a. The FY2016 LTI awards. Further details are provided in section 5.3; and.
 b. the Deferred Equity component of the FY2016 STI award, calculated
- b) the Defended Equity component of the P 12018 ST award, calculated by reference to the volume weighted average price of the Company's shares for the 20 day trading period commencing 10 trading days prior to 30 June 2016. The granting of rights occurred on 17 March 2017. Further details are provided in section 5.2.
- (B) The value of LTI performance rights granted in the year is the fair value of the performance rights at grant date.

The value of deferred STI rights granted in the year has been calculated using the volume weighted average price of the Company's shares for the 20 day trading period commencing 10 trading days prior to 30 June 2016. Unvested LTI and STI awards have a minimum value of zero if they do not meet the relevant performance or service conditions.

The maximum value of unvested LTI and STI awards is the sale price of the Company's shares at the date of vesting, or where applicable, exercise (plus the value of any dividend equivalent payment attaching to the award on vesting or, where applicable exercise).

(C) Tranche 3 of the 2012 LTI performance rights vested at a rate of 68%. The value of LTI performance rights vested in the year is the fair value of the performance rights at grant date. Tranche 1 and the contingent portion of the FY2015 STI Deferred Equity rights vested during the period. The vested value of rights exercised has been calculated using the volume weighted average price of the Company's shares for the 20 day trading period commencing 10 trading days prior to 1 July 2015.

Tranche 2 of the FY2014 STI Deferred Shares vested during the period. The vested value has been calculated using the volume weighted average price of the Company's shares for the 20 day trading period commencing 10 trading days prior to the effective grant date of 27 August 2014.

- (D) The year in which the lapsed performance rights, options or deferred shares were granted.
- 1 The 2013 LTI Rights TSR Tranche 1 lapsed due to the performance condition not being met.
- 2 The 2012 LTI Rights TSR Tranche 3 vested in September 2016 at a rate of 68%.
- 3 The 2013 LTI Rights TSR Tranche 1 award lapsed and 32% of 2012 LTI Rights TSR Tranche 3 award lapsed due to the performance conditions not being met.

7.4 Additional disclosures relating to ordinary shares

The movement during the reporting period in the number of ordinary shares in the Company held, directly, indirectly or beneficially, by each Executive KMP and each Non-executive Director, including their related, parties is as follows:

No. of shares	Held at 1 July 2016	Received on vesting and exercise of STI/LTI	Received as remuneration	Other net change	Held at 30 June 2017

Notes to the consolidated financial statements

For the year ended 30 June 2017

1. About this report

1.1 Reporting entity

Whitehaven Coal Limited ('Whitehaven' or 'Company) is a for-profit entity, and the principal activity of Whitehaven and its controlled entities (referred to as the 'Group') is the development and operation of coal mines in New South Wales. The consolidated general purpose financial report of the Group for the year ended 30 June 2017 was authorised for issue in accordance with a resolution of the directors on 17 August 2017. Whitehaven Coal Limited is a company limited by shares incorporated and domiciled in Australia whose shares are publicly traded on the Australian Securities Exchange. The address of the Company's registered office is Level 28, 259 George Street, Sydney NSW 2000.

1.2 Basis of preparation

The financial report is a general purpose financial report, which has been prepared in accordance with the requirements of the Corporations Act 2001, Australian Accounting Standards (AAS) and other authoritative pronouncements of the Australian Accounting Standards Board (AASB). The financial report also complies with International Financial Reporting Standards (IFRS) issued by the International Accounting Standards Board (IASB) and interpretations of the International Financial Reporting Interpretations Committee (IFRIC).

The financial report has been prepared on a historical cost basis, except for derivative financial instruments and available for sale financial assets that have been measured at fair value (refer to note 5.3).

The Company is of a kind referred to in ASIC Corporations Instrument 2016/191 and dated 24 March 2016 and in accordance with that Class Order, all financial information has been presented in Australian dollars and rounded to the nearest thousand dollars unless otherwise stated.

1.3 Significant accounting judgements, estimates and assumptions

In the process of applying the Group's accounting policies, management has made a number of judgements and applied estimates of future events of which form the basis of the carrying values of assets and liabilities that are not readily apparent from other sources. Judgements and estimates which are material to the financial report are found in the following notes:

2.3	Taxes	page 45
4.1	Property, plant and equipment	page 51
4.2	Exploration and evaluation	page 52
4.4	Provisions	page 54
6.1	Group's subsidiaries and interests in joint operations	page 68

1.4 Summary of other significant accounting policies

The accounting policies set out below, and in the notes, have been applied consistently to all periods presented in these consolidated financial statements and have been applied consistently by all subsidiaries in the Group. Other significant accounting policies are contained in the notes to the consolidated financial statements to which they relate.

i. Basis of consolidation

The consolidated financial report of the Company for the financial year ended 30 June 2017 comprises the Company and its subsidiaries and the Group's interest in joint operations (together referred to as the 'Group').

ii. Foreign currency translation

Transactions in foreign currencies are initially recorded in the functional currency by applying the exchange rates ruling at the date of the transaction. Monetary assets and liabilities denominated in foreign currencies are retranslated at the rate of exchange ruling at the balance date. Foreign exchange differences arising on translation are recognised in the consolidated statement of comprehensive income.

Both the functional and presentation currency of the Company and of all entities in the Group is Australian dollars (\$).

iii. Goods and services tax

Revenues, expenses and assets (excluding receivables) are recognised net of the amount of goods and services tax (GST), except where the amount of GST incurred is not recoverable from the taxation authority. In these circumstances, the GST is recognised as part of the cost of acquisition of the asset or as part of the expense.

Receivables and payables are stated with the amount of GST included. The net amount of GST recoverable from, or payable to, the ATO is included as a current asset or liability in the consolidated statement of financial position.

Cash flows are included in the consolidated statement of cash flows on a gross basis and the GST components of cash flows arising from investing and financing activities which are recoverable from, or payable to, the ATO are classified as operating cash flows.

iv. Notes to the consolidated financial statements

The notes to these consolidated financial statements have been organised into logical groupings to present more meaningful and dynamic information to users. To the extent possible the relevant accounting policies and numbers have been provided in the same note. The Group has also reviewed the notes for materiality and relevance and provided additional information where considered material and relevant to the operations, financial position and performance of the Group.

2. Group performance

2.1 Segment reporting

Identification of reportable segments

The Group identifies its operating segments based on the internal reports that are reviewed and used by the executive management team in assessing performance and in determining the allocation of resources. The performance of operating segments is evaluated at least monthly based on revenues and profit before taxes and is measured in accordance with the Group's accounting policies.

The Group has determined that it has two reportable segments: Open Cut Operations and Underground Operations.

Unallocated operations includes coal trading, corporate, marketing and infrastructure functions which are managed on a group basis and are not allocated to reportable segments.

The Group's financing (including finance costs and finance income), depreciation and income taxes are managed on a group basis and are not allocated to reportable segments.

The following table represents revenue and profit information for reportable segments:

	Open Cut operations	Underground operations	Unallocated operations	Total
YEAR ENDED 30 JUNE 2017	\$'000	\$'000	\$'000	\$'000
Revenue				
Sales to external customers	1,216,746	515,669	40,827	1,773,242

Capital expenditure				
Segment expenditure	19,117	54,074	8,230	81,421

2.1 Segment reporting (cont.)

Other segment information

Revenue from external customers is attributed to geographic location based on final shipping destination.

2. Group performance (cont.)

2.1 Segment reporting (cont.)

Major customers

The Group has three major customers which account for 30.5% (2016: 34.4%) of external revenue.

Recognition and measurement:

Revenue from the sale of coal is recognised and measured at the fair value of consideration received or receivable to the extent that:

- i. it is probable that the economic benefits will flow to the Group and the revenue can be reliably measured;
- ii. the significant risks and rewards of ownership have been transferred to the buyer; and
- iii. transfer of risk and rewards are considered to have passed to the buyer under the terms of the individual contracts.

2.2 Significant items

The items below are significant to the understanding of the overall results of the consolidated group. The Company believes the disclosure of these items provides readers of the financial statements with further meaningful insights to understand the financial performance of the Group.

Included within the balances presented on the face of the Consolidated Statement of Comprehensive Income:

	2017	2016
NOTE	\$'000	\$'000
Impairment of assets:		
Impairment of exploration and related assets'	(54,963)	
Significant items before tax	(54,963)	-
Applicable income tax benefit	16,490	-
Recognition of unbooked tax losses ²	76,672	
Significant items after tax	38,199	-

1 During the year ended 30 June 2017, an impairment charge of \$55m was recognised in respect of early stage exploration assets. The impairment charge reflects the Group's current focus on Vickery and brownfield expansion opportunities. As a consequence, the development of early stage exploration projects, although prospective, is not imminent.

2 During the year ended 30 June 2017, the Group recognised a deferred tax asset in respect of previously unrecognised income tax losses. The recognition of these tax losses was in accordance with the principles of AASB 112 Income taxes which requires the recognition of a deferred tax asset in respect of tax losses where sufficient taxable temporary differences exist or utilisation of the income tax losses is probable in the foreseeable future.

2.3 Taxes

Net tax assets/(liabilities)	32,729	103,573	-	-

d. Unrecognised deferred tax assets

During the year the Group recognised a deferred tax asset of \$76.7m in respect of previously unrecognised income tax losses. Following the recognition of this amount there were no unrecognised income tax losses at 30 June 2017 (2016: \$76.7m).

Recognition and measurement:

Income tax on the profit or loss for the year comprises current and deferred tax. Income tax relating to items recognised directly in other comprehensive income is recognised in other comprehensive income and not in the net profit or loss for the year.

Current tax

Current tax assets and liabilities are measured at the amount expected to be recovered or paid to the taxation authorities based on the taxable income for the year, using tax rates enacted or substantively enacted at the balance date.

Deferred tax

Deferred tax expense is the movement in the temporary differences between the carrying amount of an asset or liability in the consolidated statement of financial position and its tax base.

Deferred tax liabilities are recognised for all taxable temporary differences. Deferred tax assets, including unused tax losses, are recognised in relation to deductible temporary differences and carried forward income tax losses only to the extent that it is probable that sufficient future taxable profits will be available to utilise them. Deferred tax assets and liabilities are not recognised for taxable temporary differences that arise from goodwill or from the initial recognition (other than in a business combination) of assets and liabilities in a transaction that affects neither accounting profit nor the taxable profit.

The carrying amount of deferred tax assets is reviewed at each reporting date and reduced to the extent that it is no longer probable that sufficient taxable profit will be available to allow all or part of the deferred tax asset to be utilised.

Deferred tax assets and liabilities are measured at the tax rates that are expected to apply in the period in which the liability is settled or the asset is realised, based on tax rates and laws that have been enacted or substantively enacted at the balance date.

Offsetting deferred tax balances

Deferred tax assets and liabilities are offset only if a legally enforceable right exists to offset current tax assets and liabilities and the deferred tax assets and liabilities relate to income taxes levied by the same taxation authority on the same taxable entity.

Tax consolidation

Whitehaven Coal Limited and its wholly owned Australian resident subsidiaries have formed a tax consolidated group with effect from 29 May 2007 and are therefore taxed as a single entity from that date. Whitehaven Coal Limited is the head entity of the tax consolidated group. The entities within the tax consolidated group have entered into a tax sharing arrangement which provides for the allocation of income tax liabilities between the entities, should the head entity default on its tax payment obligations. No amounts have been recognised in the financial statements in respect of this agreement as payment of any amounts under the tax sharing agreement is considered remote.

The entities within the tax consolidated group have also entered into a tax funding agreement. The Group has applied the Group allocation approach in determining the appropriate amount of current taxes and deferred taxes to allocate to members of the tax consolidated group. Under the terms of the tax funding arrangement Whitehaven Coal Limited and each of the entities in the tax consolidated group have agreed to pay (or receive) a tax equivalent payment to (or from) the head entity, based on the current tax liability or current tax asset of the entity.

Whitehaven Coal Limited and the subsidiaries in the tax consolidated group continue to account for their own current and deferred tax amounts. The amounts are measured as if each entity in the tax consolidated group continues to be a standalone tax payer in its own right. The current tax balances are then transferred to Whitehaven Coal Limited via intercompany balances.

Significant accounting judgements, estimates and assumptions

Deferred tax assets, including those arising from unrecouped tax losses, capital losses and temporary differences, are recognised only where it is considered more likely than not that they will be recovered, which is dependent on the generation of sufficient future taxable profits.

Assumptions about the generation of future taxable profits depend on management's estimates of future cash flows. These depend on estimates of future production and sales volumes, operating costs, rehabilitation costs, capital expenditure, dividends and other capital management transactions. Judgements are also required about the application of income tax legislation. These judgements and assumptions are subject to risk and uncertainty, hence there is a possibility that changes in circumstances will alter expectations, which may impact the amount of deferred tax assets and deferred tax liabilities recognised on the consolidated statement of financial position and the amount of other tax losses and temporary differences not yet recognised which may require adjustment, resulting in a corresponding credit or charge to the consolidated statement of comprehensive income.

2. Group performance (cont.)

2.4 Earnings per share

Basic earnings per share

The calculation of basic earnings per share is based on the profit attributable to ordinary shareholders and a weighted average number of ordinary shares outstanding during the year calculated as follows:

	2017	2016
Profit attributable to ordinary shareholders		
Net profit attributable to ordinary shareholders (\$'000)	406,445	20,488
Weighted average number of ordinary shares		
Issued ordinary shares at 1 July (000's)	992,026	992,026
Effect of shares issued/(acquired) during the year (000's)	(5,959)	(1,554)
Weighted average number of ordinary shares at 30 June (000's)	986,067	990,472
Basic earnings per share attributable to ordinary shareholders (cents)	41.2	2.1

Diluted earnings per share

The calculation of diluted earnings per share is based on the profit attributable to ordinary shareholders and a weighted average number of ordinary shares outstanding adjusted for the diluting impact of potential equity instruments calculated as follows:

	2017	2016
Profit attributable to ordinary shareholders (diluted)		
Net profit attributable to ordinary shareholders (diluted) (\$'000)	406,445	20,488
Weighted average number of ordinary shares (diluted)		
Weighted average number of ordinary shares (basic) (000's)	986,067	990,472
Effect of share options/performance rights on issue (000's)	12,902	8,612
Weighted average number of ordinary shares (diluted) (000's)	998,969	999,084
Diluted earnings per share attributable to ordinary shareholders (cents)	40.7	2.1

3. Working capital and cash flows

3.1 Trade and other receivables

	2017	2016
	\$'000	\$'000
Current		
Trade receivables	84,570	47,586
Other receivables and prepayments	18,674	9,758
Receivables due from joint operations	10,034	4,775
	113,278	62,119
Non-current		
Other receivables and prepayments	10,853	15,381

Recognition and measurement:

Trade receivables, which generally have between 5 and 21 day terms, are recognised initially at fair value and subsequently measured at amortised cost using the effective interest method, less any allowance for impairment. Recoverability of trade receivables is reviewed on an ongoing basis.

3.2 Inventories

Current

	99,144	68,737
Consumables and stores	25,473	24,201
Coal stocks ¹	73,671	44,536

1 Coal stocks include run of mine and product coal.

Recognition and measurement:

Inventories are measured at the lower of cost and net realisable value. Net realisable value is the estimated selling price in the ordinary course of business, less the estimated costs of completion and selling expenses.

The cost of coal inventories is determined using a weighted average basis. Cost includes direct material, overburden removal, mining, processing, labour, mine rehabilitation costs incurred in the extraction process and other fixed and variable overhead costs directly related to mining activities. Stockpiles are measured by estimating the number of tonnes added and removed from the stockpile, the tonnes of contained coal are based on assay data, and the estimated recovery percentage is based on the expected processing method. Stockpile tonnages are verified by periodic surveys.

3.3 Trade and other payables

Current		
Trade payables	64,902	57,241
Other payables and accruals	101,152	78,687
	166,054	135,928

Recognition and measurement:

Trade and other payables are initially recognised at fair value and subsequently measured at amortised cost when goods and services are received, whether or not billed to the Group, prior to the end of the reporting period. Due to their short-term nature they are not discounted. The amounts are unsecured and are usually paid within 30 days of recognition.

3. Working capital and cash flows (cont.)

3.4 Reconciliation of cash flows from operating activities

		2017	2016
	NOTE	\$'000	\$'000
Profit for the period		405,367	20,488
Adjustments for:			
Depreciation and amortisation		133,882	130,385
Amortisation of deferred development costs	4.1	55,389	55,134
Development costs deferred	4.1	(86,206)	(65,798)
Write-off of finance facility upfront costs		1,194	-
Amortisation of finance facility upfront costs		5,999	6,835
Non cash interest expense accruals		(6,718)	1,925
Foreign exchange losses unrealised		4,571	770
Write-off of assets	2.2	54,963	-

Recognition and measurement:

Property, plant and equipment

Property, plant and equipment are measured at cost less accumulated depreciation and any accumulated impairment losses. Cost includes expenditure that is directly attributable to the acquisition of the items and costs incurred in bringing assets into use. Costs of dismantling and site rehabilitation are also capitalised, if the recognition criteria is met. Subsequent expenditure is capitalised when it is probable that the future economic benefits associated with the expenditure will flow to the Group.

Depreciation

Depreciation and amortisation is charged to the consolidated statement of comprehensive income on a straight line basis at the rates indicated below. Depreciation commences on assets when it is deemed they are capable of operating in the manner intended by management:

 freehold land not depreci

- plant and equipment 2% 50%
- leased plant and equipment 3% 14%
- mining property and development, deferred development and deferred stripping units of production

The residual value, the useful life and the depreciation method applied to an asset are reassessed at least annually. Any changes are accounted for prospectively.

When an asset is surplus to requirements or no longer has an economic value, the carrying amount of the asset is written down to its recoverable amount.

Mining property and development

Mine property and development assets include costs transferred from exploration and evaluation assets once technical feasibility and commercial viability of an area of interest are demonstrable. After transfer, all subsequent mine development expenditures is similarly capitalised, to the extent that commercial viability conditions continued to be satisfied.

Leased plant and equipment

Assets held under lease, which transfer to the Group substantially all the risks and benefits incidental to ownership of the leased item, are capitalised as property, plant and equipment at the inception of the lease at the lower of the fair value of the leased asset or the estimated present value of the minimum lease payments. Lease assets are depreciated over the shorter of the estimated useful life of the asset and the lease term.

The corresponding finance lease obligation is included within interest bearing liabilities (refer to Note 5.1). Finance charges are recognised as an expense in the consolidated statement of comprehensive income over the lease term to reflect a constant rate of interest over the remaining balance of the obligation.

Operating lease payments are recognised as an expense in the consolidated statement of comprehensive income on a straight-line basis over the lease term. Operating lease incentives are recognised as a liability when received and subsequently reduced by allocating lease payments between rental expense and a reduction of the liability.

Ongoing contracted commitments under financing and operating leases are disclosed within Note 7.3.

Deferred development

Deferred development mainly comprises capitalised costs (deferred development expenditure) related to underground mining incurred to expand the capacity of an underground mine and to maintain production.

Deferred stripping

Expenditure incurred to remove overburden or waste material during the production phase of an open cut mining operation is deferred to the extent it gives rise to future economic benefits and charged to operating costs on a units of production basis using the estimated average stripping ratio for the area being mined. Changes in estimates of average stripping ratios are accounted for prospectively. The stripping activity asset is subsequently depreciated on a units of production basis over the life of the identified component of the ore body that became more accessible as a result of the stripping activity.

For the purposes of assessing impairment, deferred stripping assets are grouped with other assets of the relevant cash generating unit.

Impairment

The carrying amounts of the Group's non-financial assets are reviewed at each balance date to determine whether there is any indication of impairment. If any such indication exists, the asset's recoverable amount is estimated. For intangible assets that have indefinite lives or that are not yet available for use, recoverable amount is estimated at each reporting date.

For the purpose of impairment testing, assets are grouped together into the smallest group of assets that generates cash inflows from continuing use that are largely independent of the cash inflows of other assets or groups of assets (the 'cash-generating unit'). The recoverable amount of an asset or cash-generating unit is the greater of its value in use and its fair value less costs of disposal ('FVLCD'). In assessing FVLCD, the estimated future cash flows are discounted to their present value using a pre-tax discount rate that reflects current market assessments of the time value of money and the risks specific to the asset.

An impairment loss is recognised whenever the carrying amount of an asset or its cash-generating unit exceeds its recoverable amount. Impairment losses recognised in respect of cashgenerating units are allocated to reduce the carrying amount of the assets in the unit (group of units) on a pro rata basis.

Significant accounting judgements, estimates and assumptions

Recoverable amount of assets

The recoverable amounts of cash-generating units and individual assets have been determined based on the higher of value-in-use calculations and FVLCD. These calculations require the use of estimates and assumptions.

Expected future cash flows used to determine the FVLCD of tangible assets are inherently uncertain and could materially change over time. They are significantly affected by a number of factors including reserves and production estimates, together with economic factors such as spot and future coal prices, discount rates, foreign currency exchange rates, estimates of costs to produce reserves, stripping ratio, production rates and future capital expenditure. It is reasonably possible that these assumptions may change which may then impact the estimated life of mine which could result in a material adjustment to the carrying value of tangible assets.

The determination of FVLCD for a CGU is considered to be a Level 3 fair value measurement, as they are derived from valuation techniques that include inputs that are not based on observable market data. The Group considers the inputs and the valuation approach to be consistent with the approach taken by market participants.

The recoverable amount has been determined by the FVLCD method, determined based on the net present value of the future estimated cash flows. These cash flows are discounted using a real pre-tax discount rate of 11%. The coal prices and foreign

exchange rates applied for the first three years of the cash flow estimates are based on detailed financial budgets approved by senior management which includes consideration of external sources. Long term estimates are based on a consideration of third party forecasts and management estimates in respect of long term incentive coal prices in the seaborne export coal market.

Costs to dispose are estimated based on the current market rate applied by advisors in respect of the disposal of mining assets.

Mineral reserves and resources

The estimated quantities of economically recoverable Reserves and Resources are based upon interpretations of geological and geophysical models and require assumptions to be made requiring factors such as estimates of future operating performance, future capital requirements and short and long term coal prices. The Group is required to determine and report Reserves and Resources under the Australian Code for Reporting Mineral Resources and Ore Reserves December 2012 (the JORC Code). The JORC Code requires the use of reasonable investment assumptions to calculate reserves and resources. Changes in reported Reserves and Resources can impact the carrying value of property, plant and equipment, provision for rehabilitation as well as the amount charged for amortisation and depreciation.

4. Resource assets and liabilities (cont.)

4.2 Exploration and evaluation

206,583
5,161
(54,963)
156,781
201,346
5,237
206,583

Exploration and evaluation assets include tenements granted by the Queensland State Government which are subject to periodic relinquishment requirements of up to 20% per year.

During the year ended 30 June 2017, an impairment charge of \$55m was recognised in respect of early stage exploration assets, which is not allocated to a segment. Exploration and evaluation assets are carried at cost. This value represents the Group's view of these assets. The impairment charge reflects the Group's current focus on Vickery and brownfield expansion opportunities. As a consequence, the development of early stage exploration projects, although prospective, is not imminent.

Recognition and measurement:

Exploration and evaluation assets, including the costs of acquiring licences, are capitalised on an area of interest basis and only after the Company has obtained the legal rights to explore the area.

Exploration and evaluation assets are only recognised if the rights of the area of interest are current and either:

- the expenditures are expected to be recouped through successful development and exploitation of the area of interest; or
- ii. activities in the area of interest have not at the reporting date, reached a stage which permits a reasonable assessment of the existence or otherwise of economically recoverable reserves and active and significant operations in, or in relation to, the area of interest are continuing.

Exploration and evaluation assets are assessed for impairment if:

- i. sufficient data exists to determine technical feasibility and commercial viability, and
- facts and circumstances suggest that the carrying amount exceeds the recoverable amount. For the purposes of impairment testing, exploration and evaluation assets are not allocated to cash-generating units.

Where a potential impairment is indicated, an assessment is performed for each area of interest or at the CGU level, in line with the assessment disclosed at note 4.1. To the extent that capitalised expenditure is not expected to be recovered it is charged to the consolidated statement of comprehensive income. Once the technical feasibility and commercial viability of the extraction of mineral resources in an area of interest are demonstrable, exploration and evaluation assets attributable to that area of interest are first tested for impairment and then reclassified to mining property and development assets within property, plant and equipment.

Significant accounting judgements, estimates and assumptions

The application of the Group's accounting policy for exploration and evaluation expenditure requires judgement in determining whether future economic benefits are likely, which may be based on assumptions about future events or circumstances. Estimates and assumptions made may change if new information becomes available. If, after expenditure is capitalised, information becomes available indicating that the recovery of expenditure is unlikely, the amount capitalised is written off in the consolidated statement of comprehensive income in the period when the new information becomes available. The recoverability of the carrying amount of exploration and evaluation assets is dependent on the successful development and commercial exploitation or sale of the respective areas of interest.

4.3 Intangible assets

Balance at 30 June 2016	8,581	-	11,237	19,818

1 As part of the agreement to cancel previously existing infrastructure sharing arrangements Whitehaven agreed to pay 10.1% of the construction cost of the shared portion of the Boggabri - Maules Creek rail spur. In return, Whitehaven receives access to rail tonnes on the joint rail spur.

Recognition and measurement:

Water access rights

The Group holds water access rights, which have been determined to have an indefinite life. The water access rights have been recognised at cost and are assessed annually for impairment. The carrying amounts of water access rights are reviewed at each balance date to determine whether there is any indication of impairment. When reviewing for indicators of impairment, the Group considers mining plans, project approvals and market values, among other factors, in line with those disclosed at note 4.1.

Rail access rights

Rail access rights have a finite useful life and are carried at cost less, where applicable, any accumulated amortisation and accumulated impairment losses. Rail access rights are amortised over the life of the mine or access agreement.

4.4 **Provisions**

	Mine rehabilitation and closure	Other provisions	Total
	\$'000	\$'000	\$'000
Balance at 1 July 2016	89,393	2,863	92,256
Provisions reassessed during the period	(1,513)	-	(1,513)
Provisions used during the period	-	(2,863)	(2,863)
Unwind of discount	1,882	-	1,882
Balance at 30 June 2017	89,762	-	89,762

	2017	2016
	\$'000	\$'000
Current	5,188	7,260
Non-current	84,574	84,996
Balance at 30 June	89,762	92,256

Other provisions include amounts recognised on acquisition of subsidiaries as part of the purchase price allocation and amounts for costs expected to be incurred for maintaining Sunnyside mine in care and maintenance.

4. Resource assets and liabilities (cont.)

4.4 Provisions (cont.)

Recognition and measurement:

Provisions are recognised when:

- the Group has a present legal or constructive obligation as a result of a past event;
- it is probable that resources will be expended to settle the obligation; and
- the amount of the provision can be measured reliably.

Mine rehabilitation and closure

Provisions are made for the estimated cost of rehabilitation relating to areas disturbed during the mine's operation up to reporting date but not yet rehabilitated. The nature of rehabilitation activities includes dismantling and removing operating facilities, re-contouring and top soiling the mine, and restoration, reclamation and revegetation of affected areas. Provision has been made in full for all disturbed areas at the reporting date based on current estimates of costs to rehabilitate such areas, discounted to their present value based on expected future cashflows.

The obligation to rehabilitate arises at the commencement of the mining project and/or when the environment is disturbed at

the mining location. At this point, the provision is recognised as a liability with a corresponding asset included in mining property and development assets. Additional disturbances or changes in the rehabilitation costs are reflected in the present value of the rehabilitation provision, with a corresponding change in the cost of the associated asset. In the event the restoration provision is reduced, the cost of the related asset is reduced by an amount not exceeding its carrying value.

The unwinding of the effect of discounting the provision is recorded as a finance cost in the consolidated statement of comprehensive income. The carrying amount capitalised as a part of mining, property and development is depreciated over the useful life of the related asset.

For closed mines, changes to estimated costs are recognised immediately in the consolidated statement of comprehensive income.

The amount of the provision relating to rehabilitation of environmental disturbance caused by on-going production and extraction activities is recognised in the consolidated statement of comprehensive income as incurred.

Significant accounting judgements, estimates and assumptions

Significant estimates and assumptions are made in determining the provision for mine rehabilitation as there are numerous factors that will affect the ultimate liability payable. These factors include estimates of the extent and costs of rehabilitation activities, technological changes, regulatory changes, cost increases, and changes in discount rates. Those uncertainties may result in future actual expenditure differing from the amounts currently provided. The provisions at balance date represent management's best estimate of the present value of the future rehabilitation costs required.

5. Capital structure and financing

5.1 Interest-bearing loans and borrowings

	2017	2016
	\$'000	\$'000
Current liabilities		
Finance lease liabilities	17,682	14,420
Secured loans	11,908	10,031
Capitalised borrowing costs	(6,030)	(6,228)
	23,560	18,223
Non-current liabilities		
Senior bank facility	325,000	835,000
Finance lease liabilities	17,353	69,073
Secured loans	40,261	32,042
Capitalised borrowing costs	(7,899)	(13,583)
	374,715	922,532
	398,275	940,755
Financing facilities	1,187,204	1,351,766
Facilities utilised at reporting date	412,204	960,566
Facilities not utilised at reporting date	775,000	391,200

Financing activities during the financial year

During the current year \$510 million of debt drawn under the senior bank facility was repaid (2016: \$65 million). An amount of \$18.7 million was drawn down under the ECA facility during the year (2016: \$9.5m) and \$9.3 million of the ECA facility was repaid during the year (2016: \$8.6 million). The security provided in relation to the facilities is a fixed and floating charge over substantially all of the assets of the Group.

Refinancing of the Whitehaven train resulted in the extinguishment of a \$35.3m finance lease liability.

During the current period the Group cancelled \$100 million of the senior bank facility. The total facility available as at 30 June 2017 was \$1.1 billion (2016: \$1.2 billion).

During the year the Company entered into an additional \$55 million of secured bilateral bank guarantee facilities.

The fair values of interest bearing liabilities materially approximate their respective carrying values as at 30 June 2017 and 30 June 2016.

Recognition and measurement:

All loans and borrowings are initially recognised at the fair value of the consideration received less directly attributable transaction costs. After initial recognition, interest-bearing loans and borrowings are subsequently measured at amortised cost using the effective interest method.

5. Capital structure and financing (cont.)

5.2 Finance income and expense

	2017	2016 \$'000
	\$'000	
Recognised in the statement of comprehensive income		
Interest income	1,409	1,056
Financial income	1,409	1,056
Interest expense on finance lease liabilities	(3,202)	(6,768)
Interest on drawn debt facility	(26,254)	(41,857)
Other interest charges	(14,025)	(9,343)
Interest and financing costs	(43,481)	(57,968)
Net interest expense	(42,072)	(56,912)

Recognised directly in equity		
Net change in cash flow hedges	2,618	1,186
Income tax effect	(785)	(356)
Financial income recognised directly in other comprehensive, net of tax	1,833	830

Recognition and measurement:

Finance income comprises interest income on funds invested and foreign currency gains. Interest income is recognised as it accrues, using the effective interest method.

Finance expenses comprise interest expense on borrowings, unwinding of the discount on provisions, foreign currency losses in relation to finance leases, changes in the fair value of financial assets at fair value through profit or loss, impairment losses recognised on financial assets, and losses on hedging instruments that are recognised in profit or loss. All borrowing costs are recognised in the Statement of Comprehensive Income using the effective interest method, except where capitalised as part of a qualifying asset.

Foreign currency gains and losses are reported on a net basis.

5.3 Financial risk management objectives and policies

a. Overview

The Group's overall risk management program seeks to mitigate risks and reduce the volatility of the Group's financial performance. Financial risk management is carried out centrally by the Group's Audit and Risk Management Committee under policies approved by the Board of Directors. The Committee reports regularly to the Board on its activities and also reviews policies and systems regularly to reflect changes in market conditions and Group's activities.

The Group's principal financial risks are associated with:

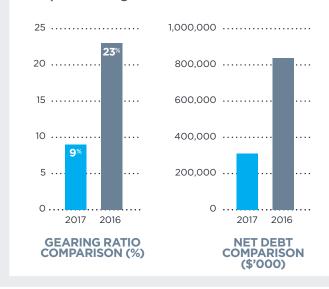

- market risk
- credit risk
- liquidity risk.

b. Capital management

The Board's policy is to maintain a strong capital base so as to maintain investor, creditor and market confidence and to sustain future development of the business. The Group defines capital as total shareholders' equity and debt. The Board manages its capital structure and makes adjustments in light of changes in economic conditions and the requirements of the financial covenants. To maintain or adjust the capital structure, the Group may adjust the dividend payment to shareholders, return capital to shareholders or issue new shares. The Group monitors capital using a gearing ratio, which is net debt divided by total capital plus net debt.

There were no changes in the Group's approach to capital management during the year.

The Group's gearing ratio is calculated as net debt divided by total equity plus net debt.

	2017	2016
	\$'000	\$'000
Interest-bearing loans and borrowings	398,275	940,755
Less: cash and cash equivalents	(87,138)	(101,453)
Net debt	311,137	839,302
Equity	3,292,296	2,887,638
Equity and net debt	3,603,433	3,726,940
Gearing ratio	9%	23%

Capital management

c. Risk exposures and responses

Market Risk - Foreign currency risk

The Group is exposed to currency risk on sales, purchases and demurrage that are denominated in a currency other than the respective functional currency of the Group, the Australian dollar (AUD). The currency in which these transactions primarily are denominated is US Dollars (USD).

The Group may use forward exchange contracts (FECs) to hedge its currency risk in relation to contracted sales where both volume and US dollar price are fixed.

In respect of other monetary assets and liabilities denominated in foreign currencies, the Group ensures that its net exposure is kept to an acceptable level by buying and selling foreign currencies at spot rates when necessary to address short-term imbalances.

During the current year ended 30 June 2017, a net foreign exchange loss of \$3.6m was recognised (2016: net foreign exchange gain of \$1.3m).

The Group designates its forward exchange contracts in cash flow hedges and measures them at fair value.

The fair value of forward exchange contracts used as hedges at 30 June 2017 was \$2.4m (2016: \$0.3m), comprising assets and liabilities that were recognised as derivatives.

At 30 June 2017, the Group had the following financial instruments that were not designated in cash flow hedges that were exposed to foreign currency risk:

	2017	2016
	\$'000	\$'000
	USD	USD
Cash	13,073	21,834
Trade and other receivables	38,100	7,612
Trade and other payables	(9,506)	(6,795)
Net statement of financial position exposure	41,667	22,651

The following exchange rates applied during the year:

	Average rate		Reporting da	ate spot rate
FIXED RATE INSTRUMENTS	2017	2016	2017	2016

Market Risk - Foreign currency risk

Sensitivity analysis

A change in 10 per cent of the Australian dollar against the following currencies at 30 June would have increased/(decreased) equity and pre-tax profit or loss by the amounts shown below. The analysis assumes that all other variables, in particular interest rates, remain constant. The analysis is performed on the same basis for 2016.

	Equity	Profit or (loss)
	\$'000	\$'000
30 JUNE 2017		
USD strengthening by 10 per cent	(7,559) (4,944)
USD weakening by 10 per cent	9,238	6,042
30 JUNE 2016		
USD strengthening by 10 per cent	(3,416) (2,788)
USD weakening by 10 per cent	4,175	3,407

Market Risk - Interest rate risk

The Group's borrowings comprise both variable and fixed rate instruments. The variable rate borrowings expose the Group to a risk of changes in cash flows due to the changes in interest rates.

Management analyses interest rate exposure on an ongoing basis and uses interest rate swaps to mitigate interest rate risk.

At the reporting date the interest rate profile of the Group's interest-bearing financial instruments was:

	Carrying amount	
	2017	2016
FIXED RATE INSTRUMENTS	\$'000	\$'000
Financial liabilities	(35,035)	(83,493)
	(35,035)	(83,493)

VARIABLE RATE INSTRUMENTS

Financial assets	87,138	101,453
Financial liabilities	(377,169)	(877,073)
	(290,031)	(775,620)
Net exposure	(325,066)	(859,113)

Sensitivity analysis for variable rate instruments

A change of 100 basis points in interest rates at the reporting date would have increased/ (decreased) equity and profit or loss by the amounts shown below. This analysis assumes that all other variables, in particular foreign currency rates, remain constant. The analysis is performed on the same basis for 2016.

	Equity	Profit or (loss) \$'000
	\$'000	
30 JUNE 2017		
100bp increase	302	(2,900)
100bp decrease	(311)	2,900
30 JUNE 2016		
100bp increase	566	(7,756)
100bp decrease	(587)	7,756

Market Risk - Commodity price risk

The Group's major commodity price exposure is to the price of coal. The Group has chosen not to hedge against the movement in coal prices.

Credit risk

Credit risk arises from the financial assets of the Group, which comprise cash and cash equivalents, trade receivables, available for sale financial assets, derivative financial instruments and the granting of financial guarantees. The Group's exposure to credit risk arises from potential default of the counter party, with a maximum exposure equal to the carrying amount of the financial assets, as outlined below.

Exposure to credit risk

The Group's maximum exposure to credit risk at the reporting date was:

		Carrying ar	mount
	NOTE	2017	2016
		\$'000	\$'000
Cash and cash equivalents		87,138	101,453
Trade and other receivables	3.1	84,570	47,586
Derivative financial instruments	5.3(d)	2,413	351
Investments		37	37
		174,158	149,427

The Group's maximum exposure to credit risk for trade receivables at the reporting date by geographic region was:

	84,570	47,586
Australia	1,604	7,711
Europe	8,925	10,845
Asia	74,041	29,030

Trade receivables

The Group's exposure to credit risk is influenced mainly by the individual characteristics of each customer. The demographics of the Group's customer base, including the default risk of the industry and country in which customers operate, has less of an influence on credit risk. Approximately 30.5% of the Group's revenue is attributable to sales transactions with three customers (2016: 34.4% with three customers).

The Group trades only with recognised, creditworthy third parties and generally does not require collateral in respect of trade receivables.

Receivable balances are monitored on an ongoing basis and as a result the exposure to bad debts is not significant.

The Group recognised an impairment loss for trade receivables of \$nil during the year ended 30 June 2017 (2016: \$nil).

The aging of the Group's trade receivables at the reporting date was:

	2017	2016
GROSS	\$'000	\$'000
Not past due	83,900	46,456
Past due 0-30 days	526	832
Past due 31-120 days	144	298
Past due 121 days to one year	-	-
More than one year	-	-
	84,570	47,586

5. Capital structure and financing (cont.)

5.3 Financial risk management objectives and policies (cont.)

Guarantees

The policy of the Group is to provide financial guarantees for statutory bonding requirements associated with the mining operations and other purposes such as security of leased premises. Guarantees are provided under the senior secured bank facility and \$105 million of secured bilateral bank guarantee facilities. Details of outstanding guarantees are provided in note 7.4.

Liquidity risk

Liquidity risk is the risk that the Group will not be able to meet its financial obligations as they fall due. The Group's approach to managing liquidity is to ensure, as far as possible, that it will always have sufficient liquidity to meet its liabilities when due, under both normal and stressed conditions, without incurring unacceptable losses or risking damage to the Group's reputation.

Typically, the Group ensures that it has sufficient cash on demand to meet all expected operational expenses as and when due, including the servicing of financial obligations. This excludes the potential impact of extreme circumstances that cannot reasonably be predicted, such as natural disasters.

The following are the contractual maturities of financial liabilities, including estimated interest payments and excluding the impact of netting agreements:

	30 June 2017						
	Carrying amount	Contractual cash flows	6 mths or less		1-2 years	2-5 years	More than 5 years
	\$'000	\$'000	\$'000	\$'000	\$'000	\$'000	\$'000
Financial liabilities							
Finance lease liabilities	35,035	37,261	7,762	11,862	17,637	-	-
Interest bearing liabilities	377,169	383,265	7,063	6,920	13,433	345,810	10,039

Forward exchange contracts:							
Outflow	80,267	83,225	83,225	-	-	-	-
Inflow	(82,680)	(85,698)	(85,698)	-	-	-	-
	575,845	584,107	178,406	18,782	31,070	345,810	10,039

	30 June 2016							
	Carrying amount	Contractual cash flows	6 mths or less		1-2 years	2-5 years	More than 5 years	
	\$'000	\$'000	\$'000	\$'000	\$'000	\$'000	\$'000	
Financial liabilities								
Finance lease liabilities	83,493	93,280	10,203	10,203	55,239	17,635	-	
Interest bearing liabilities	877,073	882,144	5,436	5,719	11,080	857,251	2,658	
Trade and other payables	135,928	135,928	135,928	-	-	-	_	
Forward exchange contracts:								
Outflow	38,116	37,579	37,579	-	-	-	-	
Inflow	(38,396)	(37,857)	(37,857)	-	-	-	-	
	1,096,214	1,111,074	151,289	15,922	66,319	874,886	2,658	

d. Net fair values

The Group complies with AASB 7 Financial Instruments: Disclosures which requires disclosure of fair value measurements by level of the following fair value measurement hierarchy:

- Level 1 measurements based upon quoted prices (unadjusted) in active markets for identical assets or liabilities,

- Level 2 measurements based upon inputs other than quoted prices included within level 1 that are observable for the asset or liability, either directly (as prices) or indirectly (derived from prices), and
- Level 3 measurements based on inputs for the asset or liability that are not based on observable market data (unobservable inputs).

The Group held the following financial instruments carried at fair value in the consolidated statement of financial position:

	30 June 2017	Level 1	Level 2	Level 3
	\$'000	\$'000	\$'000	\$'000
Assets measured at fair value				
Equity shares	37	-	-	37
Forward exchange contracts - receivable	2,413	-	2,413	-
	2,450	-	2,413	37
Liabilities measured at fair value				
Forward exchange contracts - payable	-	-	-	-
Interest rate swaps – payable	(582)	-	(582)	-
	(582)	-	(582)	-

	30 June 2016	Level 1	Level 2	Level 3
	\$'000	\$'000	\$'000	\$'000
Assets measured at fair value				
Equity shares	37	_	-	37
Forward exchange contracts - receivable	351	-	351	-
	388	-	351	37
Liabilities measured at fair value				
Forward exchange contracts - payable	(71)	_	(71)	-
Interest rate swaps – payable	(1,067)	-	(1,067)	-
	(1,138)	-	(1,138)	-

The fair value of derivative financial instruments is derived using valuation techniques based on observable market inputs, such as forward currency rates, at the end of the reporting period. The amounts disclosed in the consolidated statement of financial position are the fair values and are classified under level 2 in the fair value measurement hierarchy.

The fair value of the Group's investment in unlisted shares is classified under level 3 in the fair value measurement hierarchy. The Group's holding in unlisted shares is minor and any reasonably possible change in assumptions would not have a material impact on the Group's financial statements.

The carrying values of financial assets and financial liabilities recorded in the financial statements materially approximates their respective net fair values, determined in accordance with the accounting policies disclosed in note 3.1, 3.3 and 5.1 to the financial statements.

5. Capital structure and financing (cont.)

5.3 Financial risk management objectives and policies (cont.)

e. Financial assets and liabilities by categories

		2017			2016			
		Loans and receivables ¹	Available for sale	Other ²	Loans and receivables ¹	Available for sale	Other ²	
	NOTE	\$'000	\$'000	\$'000	\$'000	\$'000	\$'000

1 Loans at amortised cost are non-derivatives with fixed or determinable payments and are not quoted on an active market. Loans and payables are valued at amortised cost.

2 Other financial liabilities include \$0.6 million (2016: \$1.1 million) relating to derivatives in designated hedges.

Recognition and measurement:

Derivative financial instruments

The Group uses derivative financial instruments to hedge its risks associated with foreign currency and interest rate fluctuations arising from operating activities. Derivative financial instruments are initially recognised at fair value on the date on which a derivative contract is entered into, and are subsequently remeasured to fair value.

Cash flow hedges

Cash flow hedges are hedges of exposure to variability in cash flows that is attributable to a particular risk associated with forecast sales and purchases that could affect profit or loss. Changes in the fair value of the hedging instrument designated as a cash flow hedge are recognised directly in other comprehensive income to the extent that the hedge is effective. To the extent that the hedge is ineffective, changes in fair value are recognised in profit or loss.

Amounts taken to other comprehensive income are transferred out of other comprehensive income and included in the

measurement of the hedged transaction (coal sales and asset purchases) when the forecast transaction occurs.

Each designated cash flow hedge is tested for hedge effectiveness at each balance date, both retrospectively and prospectively, by using the dollar offset method. If the testing falls within the 80:125 range, the hedge is considered to be highly effective and continues to be designated as a cash flow hedge.

If the hedging instrument expires or is sold, terminated or exercised without replacement or rollover, or if it no longer meets the criteria for hedge accounting, hedge accounting is discontinued prospectively. The cumulative gain or loss previously recognised in other comprehensive income remains in other comprehensive income until the forecast transaction occurs.

Economic hedges

Derivatives which do not qualify for hedge accounting are measured at fair value with changes in fair value recognised in statement of comprehensive income.

5.4 Share capital and reserves

a. Share capital

	2017	2017		
	NO. OF SHARES	\$'000	NO. OF SHARES	\$'000
Fully paid ordinary share capital	1,026,045,885	3,136,941	1,026,045,885	3,144,944
Ordinary share capital at the beginning of the period	1,026,045,885	3,144,944	1,026,045,885	3,146,147
Transfer of shares by share plan	-	377	-	148
Shares purchased by share plan	-	(8,380)	-	(1,351)
Ordinary share capital at the end of the period	1,026,045,885	3,136,941	1,026,045,885	3,144,944

At 30 June 2017, a trust on behalf of the Company held 5,669,939 (30 June 2016: 3,707,778) ordinary fully paid shares in the Company. These were purchased during the year for the purpose of allowing the Group to satisfy performance rights to certain senior management of the Group. Refer to Note 5.5 for further details on the performance rights plan.

Terms and conditions of issued capital

Ordinary shares are classified as equity. Fully paid ordinary shares carry one vote per share, either in person or by proxy, at a meeting of the Company and carry the right to receive dividends as declared. In the event of a winding up of the Company, fully paid ordinary shares carry the right to participate in the proceeds from the sale of all surplus assets in proportion to the number of and amounts paid up on shares held. Under the terms of the acquisition of Boardwalk Resources Limited, 34,020,000 ordinary shares are subject to a restriction deed which removes their entitlement to vote, receive dividends as declared or participate in the proceeds from the sale of all surplus assets. These restrictions will be released on reaching certain milestones.

Incremental costs directly attributable to the issue of ordinary shares and share options are recognised as a deduction from equity, net of any related income tax benefit.

b. Nature and purpose of reserves

Hedge reserve

The hedging reserve comprises the effective portion of the cumulative change in the fair value of cash flow hedging instruments related to hedged transactions that have not yet occurred.

Share-based payment reserve

The share-based payment reserve is used to record the value of share based payments provided to director related entities and senior employees under share option and long term incentive plans. Refer to note 5.5 for further details of these plans.

c. Dividends

No dividends were paid during the year ended 30 June 2017 (2016: nil).

The directors have not declared a dividend in respect of FY2017. However, the subsequent events note sets out details of a proposed distribution to shareholders which will be subject to approval by shareholders at the Company's AGM on 25 October 2017.

Dividend franking account

As at 30 June 2017 there were no franking credits available to shareholders of Whitehaven Coal Limited for subsequent financial years (2016: nil).

5. Capital structure and financing (cont.)

5.5 Share-based payments

a. Recognised share-based payment expenses

	2017	2016
EMPLOYEE EXPENSES	\$'000	\$'000
- Share options and performance rights – senior employees	4,760	3,715

Recognition and measurement:

The grant date fair value of options and performance rights granted to employees is recognised as an expense, with a corresponding increase in equity, over the period in which the employees become unconditionally entitled to the options. The amount recognised is adjusted to reflect the actual number of share options that vest, except for those that fail to vest due to market conditions not being met. Once the instruments have vested, no further expenses are recognised nor reserves reversed in respect to costs already charged. However, where the share rights or options have lapsed after vesting the Group transfers the equivalent amount of the cumulative cost for the lapsed awards from the share based payments reserve to another component of equity.

b. Types of share-based payment plans

Performance Right and option grant to CEO and senior employees

The Company issued performance rights and options to the CEO and senior employees under the Company's medium and long term incentive programs in FY2016 and FY2017. The terms and conditions of the grant are as follows.

	FY20	017	FY2016		
PERFORMANCE RIGHTS	NUMBER OF INSTRUMENTS	VESTING AND EXPIRATION DATE	NUMBER OF INSTRUMENTS	VESTING AND EXPIRATION DATE	
MTI	1,460,547	30 June 2019	1,166,796	30 June 2017	
LTI tranche 1	836,056	30 June 2019	1,371,895	30 June 2018	
LTI tranche 2	836,045	30 June 2020	1,371,887	30 June 2019	
LTI tranche 3	1,672,090	30 June 2019/201	1,829,189	30 June 2018/19	
Total	4,804,738		5,739,767		

	FY20	017	FY2016		
OPTIONS	NUMBER OF INSTRUMENTS	VESTING AND EXPIRATION DATE	NUMBER OF INSTRUMENTS	VESTING AND EXPIRATION DATE	
LTI tranche 1	1,360,181	30 June 2019	-	-	
LTI tranche 2	1,360,175	30 June 2020	-	-	
LTI tranche 3	2,720,351	30 June 2019/201	-	-	
Total	5,440,707		-		

1 To the extent that the Costs Target Hurdle is satisfied at the end of FY2019, 50% of the Awards will vest and become exercisable immediately and the remaining 50% will continue on foot, subject to a further one year service condition.

The performance rights and options are subject to a performance measure linked to relative total shareholder return (TSR) and a costs hurdle. The TSR performance measure compares the TSR performance of the Company with the TSR performance of a peer group of companies operating in the Australian resources sector. The costs hurdle performance measure relates to the Company's achieving a defined cost per tonne target. Detailed disclosures of LTI outcomes against the target are provided in the Remuneration Report. The table below details the outcomes of MTI awards that were tested in FY2017 (or for which the test period concluded on 30 June 2017) and the results of the relevant test.

			Outcomes		
MTI Year	Test Type	Performance	Vested	Lapsed	
2014	Relative TSR	10th in 21	48%	52%	
2015	Relative TSR	3rd in 23	100%	0%	

c. Movement in options and performance rights

The following table illustrates the number and weighted average exercise prices of, and movements in, options and performance rights during the year:

	Weighted average exercise price	Number of options/ rights	Weighted average exercise price	Number of options/ rights
	2017	2017	2016	2016
Outstanding at beginning of period	\$1.76	22,146,025	\$2.70	24,517,802
Exercised during the period	\$0.00	(977,608)	\$0.00	-
Granted during the period	\$0.58	11,288,016 ¹	\$0.00	6,925,746²
Forfeited during the period	\$0.00	(440,550)	\$0.00	(280,435)
Lapsed during the period	\$3.92	(9,948,789)	\$0.00	(9,017,088)
Outstanding at 30 June	\$0.30	22,067,094	\$1.76	22,146,025
Exercisable at 30 June	\$0.00	466,804	\$4.73	8,241,278

1 Includes 1,042,571 performance rights granted during the year under the FY2016 STI scheme.

2 Includes 1,185,979 performance rights granted during the year under the FY2015 STI scheme.

The outstanding balance as at 30 June 2017 is represented by:

- i. 5,440,707 options over ordinary shares having an exercise price of \$1.21, exercisable between 30 June 2019 and 31 August 2026.
- ii. 1,011,981 performance rights over ordinary shares having an exercise price of nil, exercisable between 30 June 2017 and 30 June 2018.
- iii. 3,496,265 performance rights over ordinary shares having an exercise price of nil, exercisable between 30 June 2017 and 30 June 2018.
 iv. 937,034 performance rights over ordinary shares having an exercise price of nil, exercisable on 13 August 2017.
- v. 5,488,378 performance rights over ordinary shares having an exercise price of nil, exercisable between 30 June 2018 and 30 June 2019.
- vi. 5,692,729 performance rights over ordinary shares having an exercise price of nil, exercisable between 17 August 2017 and 30 June 2020.

No share options were exercised during the year ended 30 June 2017 (2016: nil).

The weighted average remaining contractual life of share options and performance rights outstanding at 30 June 2017 is 3.7 years (2016: 0.87 years).

5. Capital structure and financing (cont.)

5.5 Share-based payments (cont.)

d. Option pricing models

The fair value of performance rights granted under the LTI program with a TSR performance hurdle is measured using a Monte Carlo Simulation model incorporating the probability of the performance hurdles being met. The fair value of performance rights with the non-market performance hurdle (costs target) is measured using the Black-Scholes option pricing formula.

The fair value of options with a TSR performance hurdle and non-market performance hurdle is measured using a combination of the Monte Carlo Simulation model and Binomial Option Pricing methods.

The following table lists the inputs to the models used for the years ended 30 June 2017 and 30 June 2016:

			Rig	hts				Opt	ions	
FY2017	MTI	MTI	LTI							
Performance hurdle	TSR	Cost	TSR	TSR	Cost	Cost	TSR	TSR	Cost

1 These subsidiaries entered into a Class Instrument 2016/785 dated 28 September 2016 and related deed of cross guarantee with Whitehaven Coal Limited. Refer to Note 6.4 for further information.

Recognition and measurement:

Subsidiaries are entities controlled by the Company. Control exists when the Company is exposed to, or has rights to, variable returns from its involvement with an entity and has the ability to affect those returns through its power over the entity. The financial statements of subsidiaries are included in the consolidated financial statements from the date on which control commences until that control ceases. All intercompany balances and transactions have been eliminated in preparing the consolidated financial statements.

6. Group structure (cont.)

6.2 Interest in joint operations

The Group has interests in the following joint operations which are proportionately consolidated in the consolidated financial statements:

		Ownership interest and voting rights	
	COUNTRY OF INCORPORATION	2017	2016
Tarrawonga Coal Project Joint Venture ¹		70%	70%
Narrabri Coal Joint Venture ¹		70%	70%
Maules Creek Joint Venture ¹		75%	75%
Dingo Joint Venture ¹		70%	70%
Ferndale Joint Venture ¹		92.5%	92.5%

Tarrawonga Coal Sales Pty Ltd²	Australia	70%	70%
Maules Creek Marketing Pty Ltd ²	Australia	75%	75%
Boggabri-Maules Creek Rail Pty Ltd ²	Australia	39%	39%

1 These entities have been classified as joint operations under AASBII Joint Arrangements, as these joint arrangements are not structured through separate vehicles.

2 The joint operations above operate as the sales and marketing vehicles or manager of the related unincorporated joint operations and require joint consent from all joint venture partners on all significant management and financial decisions. The Group recognises its share of assets, liabilities, revenues and expenses

of the above entities as joint operations under AASB11 Joint Arrangements.

Recognition and measurement:

Joint arrangements are arrangements in which two or more parties have joint control. Joint control is the contractually agreed sharing of control over an arrangement, which exists only when decisions about relevant strategic and/or key operating decisions require unanimous consent of the parties sharing control. The Group recognises its interest in jointly controlled operations by recognising its share in the assets and liabilities of the joint operation. The Group also recognises the expenses it incurs and its share of the income that it earns from the sale of goods or services by the joint operation.

Significant accounting judgements, estimates and assumptions

The Group assesses whether it has the power to direct the relevant activities of the investee by considering the rights it holds with respect to the work programme and budget approval, investment decision approval, voting rights in joint operating committees and changes to joint arrangement participant holdings. Where the Group has joint control, judgement is also required to assess whether the arrangement is a joint operation or a joint venture.

6.4 Deed of Cross Guarantee

Pursuant to ASIC Corporations Instrument 2016/785 dated 28 September 2016, the wholly-owned subsidiaries listed in Note 6.1 (refer footnote 1) are relieved from the Corporations Act 2001 requirements for preparation, audit and lodgement of financial reports, and directors' reports.

It is a condition of the Class Order that the Company and each of the subsidiaries enter into a Deed of Cross Guarantee (the 'Deed'). The effect of the Deed is that the Company guarantees to each creditor payment in full of any debt in the event of winding up of any of the subsidiaries under certain provisions of the Corporations Act 2001. If a winding up occurs under other provisions of the Corporations Act 2001, the Company will only be liable in the event that after six months any creditor has not been paid in full. The subsidiaries have also given similar guarantees in the event that the Company is wound up.

The Company and each of the relevant subsidiaries entered into the deed on 27 June 2008 with subsequent assumption deeds entered into on 27 June 2012 and 25 June 2013.

The following consolidated statement of comprehensive income and statement of financial position comprises the Company and its controlled entities which are party to the Deed of Cross Guarantee (the 'Closed Group') after eliminating all transactions between parties to the Deed.

Liability for long service leave	269	384
Liability for annual leave	13,409	11,027
	20,071	16,872

Recognition and measurement:

Wages, salaries, annual leave and sick leave

Liabilities for wages, salaries, annual leave and sick leave are recognised in respect of employees' services up to the reporting date. They are measured at the amounts expected to be paid when the liabilities are settled i.e. at undiscounted amounts based on remuneration wage and salary rates including related on-costs, such as workers compensation insurance and payroll tax.

Long-term service benefits

Liabilities for long-service leave and other long term benefits are recognised and measured at the present value of the estimated future cash outflows resulting from employees' services provided up to the reporting date. Long term benefits not expected to be settled within twelve months are discounted using the rates attached to the high quality corporate bonds at the reporting date, which most closely match the maturity dates of the related liability.

Defined contribution superannuation funds

Obligations for contributions to defined contribution superannuation funds are recognised as an expense in the consolidated statement of comprehensive income as incurred.

Contra	acted for but not provided for and payable:		
Within	one year ¹	13,151	34,593

1 There were no commitments for capital expenditure beyond one year.

b. Operating lease commitments

The Group leases mining equipment, office equipment and office space under operating leases. The leases typically run for one to five years on commercial terms. None of the leases includes contingent rentals. The operating lease expenses recognised in the statement of comprehensive income in the current year amounted to \$48,575,000 (2016: \$29,346,000).

Future minimum rentals payable under non-cancellable operating leases as at 30 June 2017 are as follows:

	186,018	123,754
Between one and five years	130,712	87,200
Less than one year	55,306	36,554

c. Finance lease commitments

Finance leases relate to property, plant and equipment with lease terms of between one to five years. At 30 June 2017, the group's finance lease liabilities are secured by the leased assets of \$45,182,000 (2016: \$83,760,000), as in the event of a default, the leased assets revert to the lessor.

iv. Electricity network access supplier	25,511	26,499
vi. Other	3,195	1,880
	275,279	198,548

Litigation

There is a number of legal and potential claims against the Group which have arisen in the ordinary course of business. As the Group believes that it has no liability for such matters, a provision has not been made for any potential adverse outcome. The Group will defend these claims and believes that any adverse outcome would not be material based on information currently available to the Group.

7.5 Subsequent events

In the interval between the end of the financial year and the date of this report there has not arisen any item, transaction or event of a material and unusual nature likely, in the opinion of the directors of the Company, to affect significantly the operations of the Group, the results of those operations, or the state of affairs of the Group, in future financial years, other than the following:

Subsequent to the end of the financial period, the Group refinanced its A\$1.2 billion Senior Secured Bank Facility in August 2017 provided by a syndicate of Australian and international banks. The new facility is comprised of a \$1.0 billion drawable revolver and a \$0.2 billion guarantee facility. The new facility's A\$1.0 billion drawable line of credit is for general corporate purposes and has a maturity of July 2021.

Subsequent to the end of the financial period, the Group repaid a further \$100 million of debt drawn under the senior bank facility.

Subsequent to the end of the financial period, the Directors have proposed a 20 cent per share distribution to shareholders, which is expected to comprise a 14 cent capital return and a 6 cent unfranked dividend. Whitehaven is seeking a class ruling from the ATO in relation to the proposed distribution. The proposed capital return component is subject to receiving shareholder approval at Whitehaven's Annual General Meeting (AGM) in October 2017 and, if approved by shareholders, will be paid in November 2017 along with the related unfranked dividend. Further details will be provided in the Notice of Meeting for the AGM.

7. Other notes (cont.)

7.6 New accounting standards and interpretations

i. Changes in accounting policy and disclosures

The accounting policies adopted in the preparation of the consolidated financial statements are consistent with those of the previous financial year, except for the adoption of new standards and interpretations effective as of 1 July 2016.

Several amendments apply for the first time in the current year. However, they do not impact the annual consolidated financial statements of the Group.

Accounting Standards and Interpretations issued but not yet effective

Australian Accounting Standards and Interpretations that have recently been issued or amended but are not yet effective and have not been adopted by the Group for the annual reporting period ended 30 June 2017 are outlined below:

AASB 9 Financial Instruments

A finalised version of AASB 9 which contains accounting requirements for financial instruments, replacing AASB 139 Financial Instruments: Recognition and Measurement. The standard contains requirements in the areas of classification and measurement, impairment, hedge accounting and derecognition. The Group has not yet determined the potential impact of the amendments on the Group's financial report. This standard applies to annual reporting periods beginning on or after 1 January 2018.

AASB 15 Revenue from Contracts with Customers

The core principle of AASB 15 is that an entity recognises revenue in accordance with the transfer of promised goods or services to customers in an amount that reflects the consideration to which the entity expects to be entitled in exchange for those goods or services. An entity recognises revenue in accordance with AASB 15 by applying the following steps: Step 1: Identify the contract(s) with the customer; Step 2: Identify the performance obligations in the contract; Step 3: Determine the transaction price; Step 4: Allocate the transaction price to the performance obligations in the contract; Step 5: Recognise the revenue when the entity satisfies a performance obligation. New disclosures about revenue are also introduced. The Group is currently in the process of completing its analysis of the potential impact of the amendments on the Group's financial report. However, as the majority of the Group's revenue is derived from contracts in which the transfer of risks and rewards occurs at the same time as the satisfaction of the performance obligation, no material changes are expected in respect of the timing and amount of revenue currently recognised by the Group. This standard applies to annual reporting periods beginning on or after 1 January 2018.

AASB 16 Leases

AASB 16 provides a new lessee accounting model which requires a lessee to recognise assets and liabilities for all leases with a term of more than 12 months, unless the underlying asset is of low value. A lessee measures right-of-use assets similarly to other non-financial assets and lease liabilities similarly to other financial liabilities. At the commencement date of a lease, a lessee will recognise a liability to make lease payments (i.e., the lease liability) and an asset representing the right to use the underlying asset during the lease term (i.e., the right-of-use assets). Assets and liabilities arising from a lease are initially measured on a present value basis. The measurement includes non-cancellable lease payments (including inflation-linked payments), and also includes payments to be made in optional periods if the lesse is reasonably certain to exercise an option to extend the lease, or not to exercise an option to terminate the lease. AASB 16 contains disclosure requirements for lessees. The Group is continuing its assessment to quantify the impact of the new standard on the Group's financial report, but expect adoption of the standard to have a material impact to the Group's financial statements. This standard applies to annual reporting periods beginning on or after 1 January 2019.

Directors' declaration

In accordance with a resolution of the directors of Whitehaven Coal Limited, I state that:

In the opinion of the Directors:

- a. the financial statements and notes of Whitehaven Coal Limited are in accordance with the Corporations Act 2001, including:
 - i. giving a true and fair view of the consolidated entity's financial position as at 30 June 2017 and of its performance for the year ended on that date; and
 - ii. complying with Australian Accounting Standards (including the Australian Accounting Interpretations) and the Corporations Regulations 2001;
- b. the financial statements and notes also comply with International Financial Reporting Standards as disclosed in note 1; and
- c. there are reasonable grounds to believe that the Company will be able to pay its debts as and when they become due and payable.
- d. this declaration has been made after receiving the declarations required to be made to the Directors in accordance with section 295A of the Corporations Act 2001 for the financial year ending 30 June 2017.
- e. as at the date of this declaration, there are reasonable grounds to believe that the members of the Closed Group identified in note 6.4 will be able to meet any obligations or liabilities to which they are or may become subject, by virtue of the Deed of Cross Guarantee.

On behalf of the Board

Independent Auditor's Report to the Members of Whitehaven Coal Limited

Report on the Audit of the Financial Report

Opinion

We have audited the financial report of Whitehaven Coal Limited (the Company) and its subsidiaries (collectively the Group), which comprises the consolidated statement of financial position as at 30 June 2017, the consolidated statement of comprehensive income, the consolidated statement of changes in equity and the consolidated statement of cash flows for the year then ended, notes to the financial report, including a summary of significant accounting policies, and the Directors' declaration.

In our opinion, the accompanying financial report of the Group is in accordance with the *Corporations Act 2001*, including:

- i giving a true and fair view of the consolidated financial position of the Group as at 30 June 2017 and of its consolidated financial performance for the year ended on that date; and
- ii complying with Australian Accounting Standards and the *Corporations Regulations* 2001.

Basis for Opinion

We conducted our audit in accordance with Australian Auditing Standards. Our responsibilities under those standards are further described in the *Auditor's Responsibilities for the Audit of the Financial Report* section of our report. We are independent of the Group in accordance with the auditor independence requirements of the *Corporations Act* 2001 and the ethical requirements of the Accounting Professional and Ethical Standards Board's APES110 *Code of Ethics for Professional Accountants* (the Code) that are relevant to our audit of the financial report in Australia. We have also fulfilled our other ethical responsibilities in accordance with the Code.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Key Audit Matters

Key audit matters are those matters that, in our professional judgment, were of most significance in our audit of the financial report of the current year. These matters were addressed in the context of our audit of the financial report as a whole, and in forming our opinion thereon, but we do not provide a separate opinion on these matters. For each matter below, our description of how our audit addressed the matter is provided in that context.

We have fulfilled the responsibilities described in the *Auditor's Responsibilities for the Audit of the Financial Report* section of our report, including in relation to these matters. Accordingly, our audit included the performance of procedures designed to respond to our assessment of the risks of material misstatement of the financial report. The results of our audit procedures, including the procedures performed to address the matters below, provide the basis for our audit opinion on the accompanying financial report.

Impairment assessment of Property, Plant & Equipment

Why significant	How our audit addressed the key audit matter
As at 30 June 2017, the Group's consolidated statement of financial position included \$3,442m of property, plant and equipment relating to operating mines.	Our procedures conducted over the Group's impairment indicator analysis included the following:
As disclosed in Note 4.1 of the financial report, the Directors' assess property, plant and equipment for indicators of impairment at each balance date. This	 assessed whether the methodology used by the Directors met the requirements of AASB136 Impairment of Assets;
involves assessment of any potential indications of impairment in property, plant and equipment including (but not limited to) significant changes to	 considered the appropriateness of the Group's identification of its cash generating unit;
market, geological, economic or legal environment changes in the markets in which Whitehaven operates, changes in the discount rate, changes in coal price, movements in foreign exchange and movement in the Group's market capitalisation. Consideration is also given to any expected future changes to operating conditions.	 assessed the Group's analysis for indicators of impairment, in conjunction with our valuation specialists. This included consideration of whether any movements in the key assumptions applied indicated potential impairment, by comparing them to historical results in addition to economic and industry forecasts;
This assessment determines whether a full impairment assessment is required.	 assessed the Group's methodologies and their documented basis for key assumptions used ir
We focused on this area due to the magnitude of the balance in the consolidated statement of financial position, and the significant judgments and	impairment assessments, as described in note 4.1;
assumptions involved in the assessment of indicators of impairment.	 considered whether the disclosures included in the financial report relating to impairment, including those specific to judgments and estimates, met the requirements of Australian

Accounting standards.

Auditors report (cont.)

Recoverability of deferred tax assets

Why significant	How our audit addressed the key audit matter
 Why significant As at 30 June 2017, the net deferred tax asset in the Group's consolidated statement of financial position includes \$356.1m of deferred tax asset. \$305.3m of this deferred tax asset relates to carried forward tax losses and tax credits. The recoverability of deferred tax assets, including those arising from carried forward tax losses and temporary differences can be subjective based upon the Group's assessment of its ability to generate sufficient future taxable profits. As disclosed in Note 2.3 of the financial statements, the Directors' assessment of recoverability of these assets is dependent upon assumptions about the generation of future taxable profits from estimates of future cash flows. These depend on estimates of future production and sales volumes, coal prices, foreign exchange rates, operating costs, rehabilitation costs, capital expenditure, dividends and other capital management transactions. This involves critical accounting estimates and assumptions, specifically relating to future cash flows and judgment relating to the 	 How our audit addressed the key audit matter We evaluated the Group's assessment of the recoverability of deferred tax assets. Our audit procedures included the following: evaluated the assumptions and methodologies used by the Group in determining the recoverability of deferred tax assets including forecast cash flows; tested the mathematical accuracy of the cash flow models; compared the cash flow forecasts with the Board approved forecast cash flows; considered the future profitability of operations based on assumptions made in forecasted cash flows, consistent with models used to support the carrying value of operating property, plant and equipment; and assessed judgments and assumptions made regarding income tax legislation with assistance from our taxation specialists where appropriate.

Mine rehabilitation and closure provisions

Why significant	How our audit addressed the key audit matter
As at 30 June 2017, the consolidated statement of financial position included \$89.8m of mine rehabilitation and closure provisions. As a consequence of its operations, the Group incurs obligations to restore and rehabilitate the environment. Rehabilitation activities are governed by a combination of legislative requirements and Group policies.	 Our procedures included the following: assessed the Group's process for recognition, review and approval of the rehabilitation provisions; agreed the disturbed areas included in rehabilitation models to surveys completed over areas requiring future rehabilitation;
Estimating the costs associated with these future activities requires considerable judgement in relation to factors such as when the rehabilitation will take place, the time period required for the rehabilitation to be effective, the extent and costs of rehabilitation activities, technological changes, regulatory changes, cost increases, and changes in economic assumptions including an appropriate rate to discount these future costs back to their net present value.	 considered the reasonableness of cost rates applied with respect to government specified cost rates; considered the competence and objectivity of management's experts, both internal or external, who produced the surveys and cost estimates; tested the mathematical accuracy of the rehabilitation models to support the provision balance;
This was considered to be a key audit matter due to the significant judgments and assumptions involved in the calculation of these mine rehabilitation and closure provisions.	 considered the discount rate applied by management; evaluated the appropriateness of accounting treatment applied to changes in the rehabilitation provision, including whether the impact is expensed or capitalised; and

 evaluated whether the judgments and estimates disclosures relating to mine closure and rehabilitation provisions met the requirements of Australian Accounting standards.

Auditors report (cont.)

EY Building a better working world

Information Other than the Financial Report and Auditor's Report Thereon

The Directors are responsible for the other information. The other information comprises the information included in the Company's 2017 Annual Report other than the financial report and our auditor's report thereon. We obtained the Directors' Report that is to be included in the Annual Report, prior to the date of this auditor's report, and we expect to obtain the remaining sections of the Annual Report after the date of this auditor's report.

Our opinion on the financial report does not cover the other information and we do not and will not express any form of assurance conclusion thereon.

In connection with our audit of the financial report, our responsibility is to read the other information and, in doing so, consider whether the other information is materially inconsistent with the financial report or our knowledge obtained in the audit or otherwise appears to be materially misstated.

If, based on the work we have performed on the other information obtained prior to the date of this auditor's report, we conclude that there is a material misstatement of this other information, we are required to report that fact. We have nothing to report in this regard.

Responsibilities of the Directors for the Financial Report

The Directors of the Company are responsible for the preparation of the financial report that gives a true and fair view in accordance with Australian Accounting Standards and the *Corporations Act 2001* and for such internal control as the Directors determine is necessary to enable the preparation of the financial report that gives a true and fair view and is free from material misstatement, whether due to fraud or error.

In preparing the financial report, the Directors are responsible for assessing the Group's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless the Directors either intend to liquidate the Group or cease operations, or have no realistic alternative but to do so.

Auditor's Responsibilities for the Audit of the Financial Report

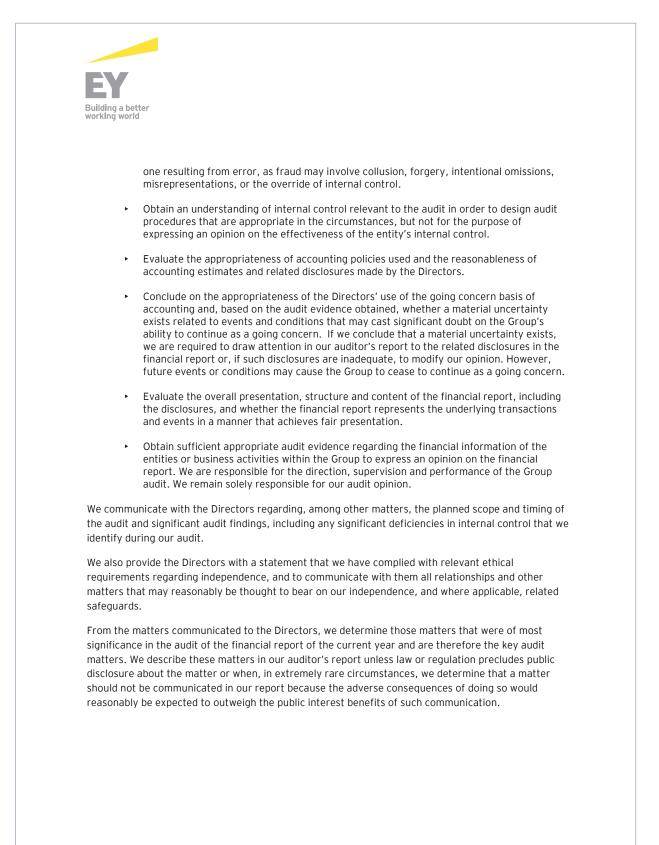

Our objectives are to obtain reasonable assurance about whether the financial report as a whole is free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with Australian Auditing Standards will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of this financial report.

As part of an audit in accordance with Australian Auditing Standards, we exercise professional judgment and maintain professional scepticism throughout the audit. We also:

 Identify and assess the risks of material misstatement of the financial report, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for

Liability limited by a scheme approved under Professional Standards Legislation

Auditors report (cont.)

Report on the Remuneration Report

Opinion on the Remuneration Report

We have audited the Remuneration Report included in pages 12 to 31 of the Directors' report for the year ended 30 June 2017.

In our opinion, the Remuneration Report of Whitehaven Coal Limited for the year ended 30 June 2017, complies with section 300A of the *Corporations Act 2001*.

Responsibilities

The Directors of the Company are responsible for the preparation and presentation of the Remuneration Report in accordance with section 300A of the *Corporations Act 2001*. Our responsibility is to express an opinion on the Remuneration Report, based on our audit conducted in accordance with Australian Auditing Standards.
